

10/18/22

Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

To whom it may concern:

Prentke Romich Company hereby requests a Permissive Change Class II of the radio equipment certification for the BGM220P certification number, FCC ID: 2AD9P- GM220P. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry. – No changes to this section.
- (b) Functional capabilities. –The SAR exclusion for portable applications was met by setting the Power Output to below 4 mW via firmware running on the device .
- (c) Antenna Characteristics. – No changes to this section.
- (d) Cosmetic differences. – No changes to this section.
- (e) Other. - Relabled the module to include updated FCC and IC IDs

I do attest that the Field strength and/or RF Output readings are lower to meet the SAR exclusion therefore qualifying this product for portable applications.

Sincerely,

 Recoverable Signature

X 

Jay C. Howard
