

Beacon SB18-3 | User Manual

Turning on and maintenance

Kontakt.io Beacons SB18-3 are maintenance-free devices. They work constantly and they are ready to be used in 'out of the box' manner. There is no need to turn the beacon on or activate it in any way. They are ready to perform once programmed and assembled. In case of possible malfunction, their users are advised to contact technical support to receive proper replacements (email: support@kontakt.io). Replacement policy also applies to performance faults caused by low battery after certain operation time. The name of the device and manufacturer are mentioned on the beacons' label.

Installation

Kontakt.io Beacons SB18-3 can be fixed on the wall by using a proper nail or a screw by means of a specially created hole in the back flip. A user needs to make sure to adhere a Beacon to the mounting surface firmly. Alternatively, one can use double-side adhesive tape and stick it to a flat and smooth surface. In such configuration it's important to follow the proper vertical orientation. Beacons should be placed the way they are hanged when mounted using nails (mounting hole must be on top). It's also important to be aware of the fact that SB18-3 are installed in the right direction, meaning the manufacturer logo must be on the opposite form the sticky tape and the mounting surface. If SB18-3 are installed this way, a user takes responsibility for choosing the right adhesive that is able to keep beacons in proper places. We recommend using at least 4cm² of the sticky tape with viscosity of 10N/cm.

WARNING

Opening beacons or fixing them is strictly forbidden.

Kontakt.io SB18-3 contain electronic elements and batteries which should be properly disposed. If one ever needs to utilize beacons, it is advisable to contact the manufacturer first.

Switching the original battery with one of a different type might cause a risk of explosion.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

IC Caution:

This device complies with Industry Canada's licence-exempt RSSs. Operation is subject to the following two conditions:

- (1) This device may not cause interference; and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

L'appareil a été évalué pour répondre aux exigences générales d'exposition RF. L'appareil peut être utilisé dans des conditions d'exposition portables sans restriction.
