Class II Permissive Change for FCC ID: 2ADAT-T12S4

We want to add a new variant to the certified torquemeter with the FCC ID: 2ADAT-T12S4.

The new variant of the T12S4 is documented in the test report EMCC-040197MAC. This type is applied with a new antenna design which has an effect of the EMC emission and minor changes in the stator PCB's for higher temperature range and higher precision as documented in the test report 040197BBC. All other parts are the same.

Due to this change the external photos, the schematics and the photos of the stator PCB's have been changed. In future both types are available.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Michael Korner', is written over the printed name.

Michael Korner
