Libre Wireless Technologies, Inc.

Date: Oct. 23, 2024

TO: Federal Communications Commission,

Authorization & Evaluation Division,

7435 Oakland Mills Road,

Columbia, MD 21046

Request for Modular Approval FCC ID: 2ADBM-LS8

Item Requirements	EUT	Confirm
		(Yes/No
1 Have its own RF shielding		Yes
2 Have buffered modulation/data inputs (if such inputs are provided)	The modular data inputs are buffered through log	Yes
	or	
	microcontroller connections. All modulation and	
	data inputs	
	are buffered by circuitry on the transmitter chip.	
3 Have its own power supply regulation	Power supply regulation is provided by circuitry	Yes
	on the	
	CPU chip.	
Meet the antenna requirements of section 15.203	The EUT meet the FCC antenna requirements, the	Yes
	modular with a special joint antenna connector.	
	And the antenna is descripted is module user	
	manual.	
Demonstrate compliance in a stand-alone configuration	The TUE is can transmitting Stand-alone.	Yes
The licensed module must have a FCC ID label on the module itself. That FCC ID label must be visible through a window on the final device or it must be visible when an access panel, door or cover is easily removed. If not, a second label must be placed on the outside of the final device.	The module is labeled with its permanently	Yes
	affixed FCC ID label. The label position is clearly	
	indicated. Please refer to label & label location	
	information.	
The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements.	The EUT is full compliant with FCC rules, please	Yes
	refer the details in user manual.	
The module must comply with RF exposure requirements. See FCC Rules. Spread Spectrum transmitters must comply with RF exposure limits in 15, 247	This module is complies with FCC CFR 47 part	Yes
	2.1091 and	
	No. of the Control of	
IIIIIII III 15.247.	limit , Please refer RF exposure report.	
	Have its own RF shielding Have buffered modulation/data inputs (if such inputs are provided) Have its own power supply regulation Meet the antenna requirements of section 15.203 Demonstrate compliance in a stand-alone configuration The licensed module must have a FCC ID label on the module itself. That FCC ID label must be visible through a window on the final device or it must be visible when an access panel, door or cover is easily removed. If not, a second label must be placed on the outside of the final device. The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements. The module must comply with RF exposure requirements. See FCC Rules. Spread Spectrum	Have its own RF shielding Have buffered modulation/data inputs (if such inputs are provided) Have buffered modulation/data inputs (if such inputs are provided) Have its own power supply regulation Have its own power supply regulation Meet the antenna requirements of section 15.203 The EUT meet the FCC antenna requirements, the modular with a special joint antenna connector. And the antenna is descripted is module user manual. The TUE is can transmitting Stand-alone. The TUE is can transmitting Stand-alone. The module is labeled with its permanently affixed FCC ID label position is clearly indicated. Please refer to label & label location information. The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements. See FCC Rules. Spread Spectrum transmitters must comply with RF exposure requirements. See FCC Rules. Spread Spectrum transmitters must comply with RF exposure limits in 15.247. The module is complies with FCC CFR 47 part 2.1091 and FCC KDB 447498 D01 General RF Exposure Guidance

Thank you for your attention to this matter.

Yours Sincerely,

Helge Kristensen
