Re: FCC ID: 2ADCB-BLMF1

To Whom It May Concern:

The following application is submitted on behalf of our client, Acuity Brands Lighting, Inc., for evaluation of their model BLMF1 for a class II permissive change certification under FCC Part 15.247.

The BLMF1 module operates in the frequency range 2402-2480 MHz and provides indoor geo-location information via Bluetooth Smart (Bluetooth Low Energy). The BLMF1 is connected to a luminaire driver used to power LED lighting, serving as a single beacon to provide 1-way communication with a user's device to define their physical location.

The purpose of this permissive change is to add an external antenna to the originally certified 2.4GHz radio.

The BLMF1 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads "R. Sam Wismer". The signature is written in a cursive, flowing style.
