Re: FCC ID: 2ADCB-XPMOD

To Whom It May Concern:

The following application is submitted on behalf of our client, Acuity Lighting Brands, Inc., for evaluation of their model XPMOD for certification under FCC Part 15.247.

The XPMOD is a stand-alone module consisting of a single printed circuit board which is designed to be integrated into specific host devices. The XPMOD meets all the modular approval requirements except for power supply regulation. The device will be exclusively used within Acuity Lighting Brands, Inc. products which will enforce the input voltage limitation to 3.6V as described in this application.

The 2ADCB-XPMOD was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive style with a large, prominent 'R'.
