Product Overview

NOTE : Please tear the stickers underneath the earphones before using.

Power On & Pairing

Turn on the left and right earphones by pressing and holding the MFB on both earphones for about 1 second .The earphones will automatically enter pairing mode . Search the list of available Bluetooth® devices for the name "TWEPlus", then select it to connect .The earphones will give the following voice prompts: Power on → Pairing (Right earphone) → Connect (Right earphone)

Power Off
1. Put the earphones into the charging box , it will power off automatically and the white LED will light up means the earphones are charging. If you put either one earphone into the charging box separately , the other one will automatically enter pairing mode.
2.When the earphone is on , press and hold the MFB for 4 seconds.

TWS Function

The right earphone is the "Master Earphone", with the built-in microphone and hands-free functionality.

The left earphone is the "Secondary Earphone", which can be paired with the left one to get stereo sound .

Make sure the two earphones are successfully powered on. They will connect automatically.

NOTE: Do not cover the earphones with your hand or anything else. Doing so can break the Bluetooth® connection.

Single Mode

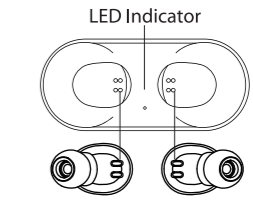

Power On and Pairing the Single Earphone

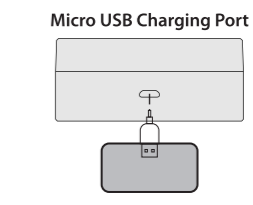

1.After pairing both earphones , if you put the left earphone back into the charging box for charging , the right earphone will still connect with your device. If the left earphone full charged , you take it out of charging box , it will connect with the right earphone automatically , then two earphones are back to stereo sound.

2.After pairing both earphones , if you put the right earphone back to the charging box for charging , the left earphone will stop playing and enter pairing mode with voice prompt "Pairing" .The pairing name is still "TWEPlus" in your device , please select to connect. Then there is voice prompt "Connected" .

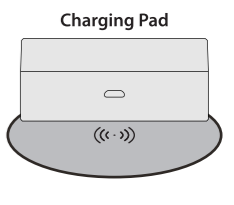

Charging

Charge Charging Box
The blue LED is on when the earphones are fully charged. The initial charging time is around 2 hours.

Connect the micro USB cable to the charging box until the blue LED indicator flashes.

Put the charging box on the wireless charging pad, the blue LED indicator flashes means it is charging.

P/N 38542 Made in China

FCC-ID: 2ADDH-MP38542

Making Calls

Once paired with your smartphone, making and answering phone calls can be managed via the multi-function button.

Answer / End a Call	Press the MFB once
Reject an Incoming Call	Double press the MFB

FAQ

Q: My earphones will not turn on.

A: Please recharge them and make sure they have enough power.

Q: Why can I only hear music from one of the earphones?

A: Make sure the earphones are synced together:

- Hold the multi-function button of both units for 1 second to power on.
- Wait a moment , the earphones will connect automatically themselves.
- If they do not connected each other , either of them will enter pairing mode.

Q: What if the left earphone cuts out, but the right one is fine ?

A: Please put the left earphone back to charging box to power off , then take out to power on . And waiting a moment to let two earphones connect again automatically.

Q: The earphones cannot be found or pairing fails.

A: The Bluetooth® application of the smartphone or device is not operating. Please restart the smartphone or device and restart the pairing process with the earphones.

Q: What if the sound is unclear?

A: Please try changing the position of your device nearer to the earphones. A direct line of sight is best.

Product Care & Use

Please keep away from liquids and extreme heat.

Do not use earphones at high volume for extended periods, as this may cause permanent hearing damage or loss.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference
- This device must accept any interference received, including interference that may cause undesired operation.
