

The PST523A and PST523 are NFC Module board. The difference between the PST523A and PST523 are only the antenna and antenna match circuit as below description, all other electronics and hardware aspects are same with each other.

The difference are:

1. PCB Antenna Layout

2. Match Circuit

The components of L4, L5, C10, C11, C9, C14, C12 and R7 of match circuit are with different value.

Both the model PST523A and PST523 are tested and the worst case mode are reported.

Sincerely
AEB Industriale Srl
Andrea Molinari
