Power bank
 <ul style="list-style-type: none"> Can connect the power bank to the base for charging. Can also use the wireless charging adapter with product Type-C port to charge your device. The charging voltage and current are DC 5V/2A (5W) 1A.
1) Charging
<ul style="list-style-type: none"> When the mobile power supply is charged, the four white LEDs are lit according to the current power, and the LED of the current power flashes. It will go off after 20 seconds. If it is charging, only the other eight LEDs will be lit. If it is charging, only the other eight LEDs will be lit after 10 seconds.
2) Discharging
<ul style="list-style-type: none"> When connect cable with type-C port, the product starts to indicate this time, the LED power indicator is on (goes off after 5s). When Type-C and wireless charging are connected at the same time, wireless charging output will stop. Press the button to turn on the wireless output, and the wireless power indicator is on.
Battery capacity/LED indicator
<ul style="list-style-type: none"> ● ● ● ● = 75% - 100% ● ● ● ○ = 50% - 75% ● ● ○ ○ = 25% - 50% ● ○ ○ ○ = 10% - 25% ○ ○ ○ ○ < 10% power <p>○ ○ ○ ○ If one of the LEDs light, your battery needs to be charged.</p>
3) Charging and discharging in combination
<ul style="list-style-type: none"> Display charging status. Priority your device charging.
4) Discharge button description
<ul style="list-style-type: none"> Short press: the button to display the current power. The blue LED light when wireless charging is in standby. LEDs will turn off after 20s. Automatic shut down after 20s. Double click the button to shut down.
5) Base
 <ul style="list-style-type: none"> When the mobile power supply is charged, the four white LEDs are lit according to the current power, and the LED of the current power flashes. It will go off after 20 seconds. If it is charging, only the other eight LEDs will be lit. If it is charging, only the other eight LEDs will be lit after 10 seconds.
1) Charging the power bank in combination status
<ul style="list-style-type: none"> Connect the Type-C port and adapter with the charging cable, connect the power supply. Insert the power bank into the base, connect it to the Type-C output port, and automatically start charging the power bank (charging LED indicator is lit in white).
2) Charging the mobile phone in combination status
<ul style="list-style-type: none"> Place the mobile phone on magnetic wireless charging in the charging area, then starts charging the mobile phone automatically. If the mobile phone is not charged, the power bank may stop in the standby state, press the button to start the power bank, then the phone starts charging.
2) Charging AirPods
<ul style="list-style-type: none"> Connect the Type-C port and adapter with the charging cable, connect the power supply. Place the AirPods in the wireless charging area of the base, then AirPods charging LED turns up and starts charging. Connect the Type-C port and adapter with the charging cable, connect the power supply. Connect the AirPods with a charging cable and charge it through the USB output port of the base.
Notes:
<ul style="list-style-type: none"> When the power is turned on, the white light turns on, then turns off after 2s when there is no load of AirPods. During standby, the LED goes off. When the earphone is charged, the LED white light is always on. During the charging process, if temporarily no power, the current will decrease and when it is full, the LED will turn off and charging again. When the charging hub is full, the green light on the front of AirPods charging status needs to be checked through your mobile phone. When FOD from earphone, LED white light flashes. In combination status, the base automatically supplies power to power bank, and the LED on the base is always on. Please put the power bank into/out of the base along the track. Do not take it out sideways. TV, 15V adapters are recommended.
