

FCC: Class II Permissive Change Request Letter

RE: FCC Request for Class II Permissive Change - Airtame ApS

Commercial Product Name: Airtame 2

FCC ID: 2ADEFAT-DG2

HVIN: AT-DG2

FVIN: cyw89342-dfs_IIIg.clm_blob

To whom it may concern.

Airtame ApS is hereby submitting an request for class II permissive change to the our product, the Airtame 2 (FCC ID: 2ADEFAT-DG2, Original Grant Date: 12/19/2018)

The change filed under this application includes the following changes:

Description of changes:

- (1) Operation within the U-NII-3 bands
- (2) Operation in the 'g' modulation in 2.4GHz
- (3) We have combined our user and safety manual into one document

There have been no hardware or electrical modifications made to the product in association with this change request. There is no increase in output power rating on new frequencies (this is seen documented in the attached reports). The equipment class remains the same as in the original grant application.

The original equipment manufacturer (Airtame ApS) will implement the abovementioned changes through a software update FVIN: cyw89342-dfs_IIIg.clm_blob. This information will be provided to our customers in an updated safety manual (see point (3) above) which is included in the product box.

This additional functionality - acting as a client in these 5GHz channels - has been added upon request from our end users.

Documents re-submitted:

- (1) RF Test Reports
 - a. 2.4GHz – g modulation
 - b. 5GHz U-NII-3 bands
- (2) Report Photos
- (3) RF Exposure Report
- (4) Operational Description
- (5) Safety Manual (combined with user manual)
- (6) Change Request Cover Letter

Please contact me if you have any questions or need further information regarding this application.

Sincerely,

Kendra Bannister
