303 River Road

Ottawa, Ontario, Canada

K1V 1H2

FCC: 2ADEQ7002

IC: 12329A-7002

Models: FitBark Wi-Fi Base Station

Operating Description

The FitBark Wi-Fi Base Station is a central Bluetooth 4.0 device which discovers nearby devices. When a FitBark Dog Activity Monitor is found, it downloads the data stored on it, and then uses Wi-Fi to send the data to a server through the local access point. Operating frequencies are in the 2.4 Ghz range for both the radios.
