

GUARANTEED FOR LIFE

Lowe's warrants to the consumer that the product and all accessories provided in the sales package ("Product") are free from material defects in material and workmanship when used normally and in accordance with operation instructions.

Lowe's will repair or replace (at Lowe's option), without charge, a Materially Defective Product. If we repair or replace a Materially Defective Product under the terms of this warranty, this warranty also applies to repaired or replacement Products. If we repair this Product, we may use new or refurbished replacement parts. If we choose to replace this Product, we may replace it with a new or refurbished Product of the same or similar design. Lowe's will return repaired or replacement Products to you in working condition. We will retain defective parts, or equipment. Repair or replacement of Product is your exclusive remedy.

This warranty does not cover Product that has been subjected to misuse, accident, shipping or other physical damage, improper installation, abnormal operation or handling, neglect, inundation, fire, water or other liquid intrusion, or Product that has been damaged due to repair, alteration or modification by anyone other than a Lowe's authorized representative.

Thank you for purchasing the **Rotating Wireless Charging Pad**. This pad supports all Qi-compatible devices. Please check your device's user manual to ensure it supports inductive Qi-charging. This charger outputs up to 1 amp inductively and supports fast charging up to 9W for compatible devices.

Please read these instructions before use.

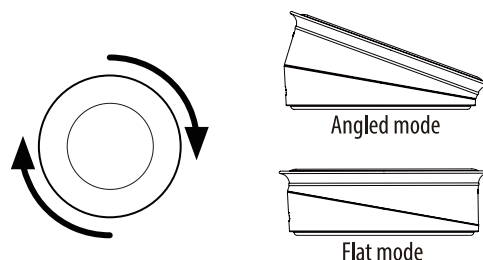

Instructions:

Insert the USB end of the input cable into a power adapter (not included).

Insert the Micro-USB end of the charging cable into the port on the wireless charger.

Place your Qi-compatible phone on the center of the Wireless Charging Pad. When the phone is being charged, the LED indicator will illuminate automatically to indicate the charging status.

Hold the charger base firmly and twist the top clockwise to rotate into angled mode. Twist the top counterclockwise to return to flat mode.

Important Safety Precautions

Please keep the charger away from water and other liquids.

Only place Qi-compatible phones on the charger. Do not place other metal or metallic objects on the charger.

When cleaning the charger, make sure it is not connected to a power source. To clean the charger, wipe it gently with a soft, dry cloth.

Specifications

Input:

Standard Charging: 5V/2A

Fast Charging: 9V 1.67A

Wireless Charger Output:

Standard Charging: Up to 1.0A at 5V (5W)

Fast Charging: Up to 1.0A at 9V (9W) (requires an adaptive type charger)

Charging Distance: ≤6mm

Package Contents

- Rotating Wireless Charging Pad
- Micro-USB Input Cable
- User Manual

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
