

CB-7.2.1 – Technical Review RT Form

FCC ID: 2ADIH-EPOC02

IC ID: 12769A-EPOC02

CT Project: p14a0008

From: Shawn McMillen

Date: 3/31/15

15.249 Please address 15.215 requirements.

1--It appears from the manual that this device can communicate with a computer and pass data. If so this device is subject to DoC as well as the FCC logo labeling requirements.

Emotiv: 4/17/15 - Revised artwork for EPOC+ and Insight products including the FCC logo. My reading of the regulations you sent indicates that applying the FCC ID with certified test reports is a stronger condition than Declaration of Conformance.

2--Since this is a portable device SAR needs to be addressed. Ideally this device will be categorically excluded from routine SAR evaluation however the MPE report provided is incorrect since MPE is meant for devices operating >20cm from a body. Please address.

CT-The Test Report has been updated

15.247

3--The Spectral density has not been addressed.

CT-The test report has been updated.

RSS-210

4--Please note that RSS-GEN no longer requires receiver spurious emissions for this type of device.

CT- Noted

5--The form 750 needs to address the 15.249 equivalent radio for IC. In addition the form 750 is not signed.

CT- Included additional form 750 for 15.249 radio

6--Once 15.215 is address please update the IC cross reference to include this.
