

Declaration-MIF for HAC RF Interference Evaluation

To whom It May Concern,

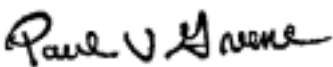

This device, with FCC ID: 2ADLJBEAT20 , Hearing Aid Compatibility Requirement is going to be certified under **ANSI C63.19-2011 version per Part20.19.**

The M rating was determined by measuring the maximum steady state average E-field values on dB(V/m) as documented in the HAC report and adding the MIF value in dB(V/m) using theoretical values provided by **ANSI C63.19-2011** under

UMTS-FDD(WCDMA)	-20.00dB
GSM-FDD(TDMA,GMSK)	+3.50dB

We confirm that the SATIMO simulation provided represents all the air interface modes applicable for a HAC rating for this handset.

Yours Sincerely,
