Office of Engineering and Technology  
Federal Communications Commission  
7435 Oakland Mills Road  
Columbia, MD 21046

Ref: FCC ID: 2ADLMFRV506

Dear Sirs:

We requests acceptance of the labeling proposal described below for mobile phone bearing FCC identifier 2ADLMFRV506

The subject cell phone are shown as figure 1.

Figure 1

Because the majority of the cell phone housing is composed of display, speaker, operating controls and a removable battery pack, there is extremely limited space available to attach the required label carrying the FCC identifier. Attaching the label to the battery pack is not acceptable because the battery pack is a removable item.

For this reason, we proposes placing the label carrying the FCC identifier inside the

battery compartment as shown in figure 2.

Figure 2

The consumer packing for these models includes the battery pack as a separate item, NOT installed on the radio. As such, the FCC identifier will be readily visible to the user before battery pack is installed and whenever the battery pack is removed or replaced. In this location, the label will also be protected from physical abuse and remain readable for the anticipated life of the device.

The consumer packaging for these models is a "gift box" which does not allow the transceiver to be seen at time of purchase. In order to meet the requirements of 47CFR Part 2.925(d), we will add the FCC identifier to the outside of the consumer "gift box" packing.

Thank you for your attention to this matter.
