Design guidance:
1. In principle, the distance W1 between the left edge of the clearance area and the plate edge should be as large as possible, and Pay attention to the distance from the bottom battery.
2. The width W2 of the main clearance area is preferably 1.5 mm to 2.5 mm..
3. The length L of the groove is 2 mm to 5 mm..
4. The 0603 antenna and the two materials at the bottom of the 0603 antenna can be interchanged up and down.
