

## Circuit Description

The 24MHz crystal oscillator drives the base.

The modulation provided by AC6956. The output of AC6956 module has the matching network consisting of that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

The antenna consists of a 2.4GHz antenna

There is no external ground connection. The ground is only that of the printed circuit board.

Frequency Range: 2402-2480 MHz
