

Operation Descriptions

1、 The main processor is AC6959B

It is made of JIELI Electronics Inc.

The BT antenna gain is -0.6dBi, frequency range is 2402-2480MHz

2、 The crystal oscillator's frequency is 24MHz.

3、 The Red and Blue LEDs are indicating the state of the Bluetooth.

4、 The DC power supply IC change the voltage from 5V to 4.2V.

It is indicated by the LED.

5、 There is a Key at the PCB for "power on & off,play,pause,call" function

6、 The microphone socket.

7、 The earphone socket.

8、 Two speaker's connectors(no op amp).

9、 The USB socket for charge.
