

#92905

Instructions:

1. Temporarily install the LED frame to check functionality before permanent installation.
2. Run the two wires of the LED frame to your 12VDC power source.
3. Your 12VDC power source should be from your vehicles running light. A running light is a light on your vehicle that turns on and stays on when the cars lights are on. Do not tap into your brake, reverse, or turn signal lights.
4. Connect the black and white wire (+) of the LED frame to the positive wire of your power source.
5. Connect the solid black wire (-) of the LED frame to any ground wire or screw on the cars frame.
6. Once functionality is confirmed, secure the LED frame to your vehicles license plate holder.
7. Remove the battery tab from the multi-color remote control. The remote control uses RF (radio frequency) so it does not require a direct line of sight to operate the LED frame. Press the red on/off button and select the desired color/light appearance.

WARNING: Laws concerning use of this product vary from state to state. Your state may prohibit its use on public roads or restrict its use to novelty plates, show-cars, or off-road areas only. In some states, including without limitation California, off-road uses are also prohibited. The manufacturer and retailer assume no responsibility for any use or application of this product in violation of any applicable law. Before installing this product, please check your state and local laws and regulations.

FCC Compliance Statement

LED Innovation 92905:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

For FCC matters please contact:

Custom Accessories Inc 5900 Ami Drive, Richmond, IL 60071

Ph. # (815) 678-1600

Please note that changes or modifications not expressly approved by the party responsible for compliance could void the users authority to operate the equipment.

FCC Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful inference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: – Reorient or relocate the receiving antenna. – Increase the separation between the equipment and receiver. – Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. – Consult the dealer or an experienced radio/TV technician for help.
