Declaration-MIF for HAC RF Interference Evaluation

To Whom It May Concern,

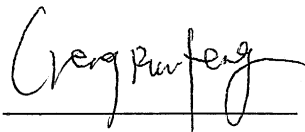

This device, with **FCC ID: 2ADOBVH777**, Hearing Aid Compatibility Requirement will be certified under ANAI C63.19-2011 version per Part 20.19.

The M rating was determined by measuring the maximum steady state average E-field values in dB(V/m) as documented in the HAC report and adding the MIF value in dB(V/m) using pre-determined values provided by Speag under UID 10081 CAB (18.06.2014)/ UID 10295 AAB (18.06.2014).

Speag-reference documentation for supporting the pre-determined MIF value is Schmid & Partner Engineering AG, UID SUMMARY (Communication Systems for Calibration, Issued Date 2014/08/05).

We confirm that the Speag simulation provided represents all the air interface modes applicable for a HAC rating for this handset.

Sincerely Yours,

Hisense International Co., Ltd
