Dear Sir/Madam,

RE: Modular Approval Request for Model: EU-SK110, US-SK110

FCC ID: 2ADQOMDNA23

The following attestation addresses the requirements to support modular approval:

Modular approval requirement	Yes	No *
(i) The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	Yes, the shielding has covered the RF chip and crystal	
(ii) The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	Yes, provides external Flash interface	
(iii) The modular transmitter must have its own power supply regulation.	Have internal voltage regulator	
(iv) The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a “unique” antenna coupler (at all connections between the module and the antenna, including the cable).	Single PCB onboard antenna	
(v) The module must demonstrate compliance in a stand-alone configuration.	Tested with a stand-	

	alone configuration	
(vi) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	Labelled on the shielding	
(vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.	Comply with operating requirements	
(viii) The modular transmitter must comply with any applicable RF exposure requirements	Comply RF exposure requirements	

Yours sincerely,

Company Officer: Flora Wu
