Safeteams

General Information

To address the employers' concerns in the current times of pandemic, Safeteams introduced a series of "Clip" devices. Lightweight and simple wearables were specifically designed to deliver social distancing and contact tracing features. Clip 2 constitutes an upgraded version of clip 1.2. It comes with a long-lasting rechargeable battery, better precision in contact tracing and a vibration feature as an additional alert.

Safeteams

User Guide

1. Please make sure the device is sufficiently charged.
2. If is charging, please unplug the device from the charger or the charging station and put it on at your preference. Note, to work properly, the device must be on you for the entire duration of your workday.
3. Note, when violating social distancing the device will alert you with the red light and a vibration. In this event, please move to a safe distance from your closet co-worker (2 m) and the alert will stop.
4. Upon the end of your workday, please return the device to its storing place.
5. Connect the device to the charger or place it on the charging station if necessary.
6. Make sure to read the safety instructions on the next page.

Safeteams

Safety

1. Note, the device is not water resistant.
2. Do not attempt to open the device.
3. Use only the original charging station or a proper charging cable (Micro USB Type B) for charging.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
