Gentlemen:

1)No hardware design changes are made on the module except the Host device uses the different antennas from those of the modules and disabled below Table 1 related to WiFi band by the software, But for other bands the software no any changed to increase the RF output power of the module. The original modular reports (report number : EC1905007RI03, EC1905007RI04) are submitted to represent the compliance regarding FCC Part 15C/15E conducted RF testing items of the host device.

The FCC Part 15C/15E radiated RF testing items are tested on this host device, and the test reports are submitted additionally.
