## FCC RF Exposure

EUT Description: Wireless Access Point

Model No.: CPE-870, CPE-880, CPE-860, CPE-3200, AP80, CPE-970, CPE-980, CPE-960, AP21, AP20, AP28, XD-9341, LT-9341

FCC ID: 2ADUG-CPE870

## 1. Limits

The criteria listed in the following table shall be used to evaluate the environment impact of human exposure to radio frequency (RF) radiation as specified in 1.1307(b)

| Frequency range<br>(MHz)                                | Electric field<br>strength<br>(V/m) | Magnetic field strength<br>(A/m) | Power density<br>(mW/cm <sup>2</sup> ) | Averaging time<br>(minutes) |  |  |  |  |
|---|-------------------------------------|----------------------------------|--|-----------------------------|--|--|--|--|
| (A) Limits for Occupational/Controlled Exposures        |                                     |                                  |  |                             |  |  |  |  |
| 0.3–3.0   | 614                                 | 1.63                             | *(100)                                 | 6                           |  |  |  |  |
| 3.0–30  | 1842/f                              | 4.89/f                           | *(900/f <sup>2</sup> )                 | 6                           |  |  |  |  |
| 30–300  | 61.4                                | 0.163                            | 1.0                                    | 6                           |  |  |  |  |
| 300-1500  |                                     |                                  | f/300                                  | 6                           |  |  |  |  |
| 1500-100,000  |                                     |                                  | 5                                      | 6                           |  |  |  |  |
| (B) Limits for General Population/Uncontrolled Exposure |                                     |                                  |  |                             |  |  |  |  |
| 0.3–1.34  | 614                                 | 1.63                             | *(100)                                 | 30                          |  |  |  |  |
| 1.34–30   | 824/f                               | 2.19/f                           | *(180/f <sup>2</sup> )                 | 30                          |  |  |  |  |
| 30–300  | 27.5                                | 0.073                            | 0.2                                    | 30                          |  |  |  |  |
| 300–1500  |                                     |                                  | f/1500                                 | 30                          |  |  |  |  |
| 1500-100,000  |                                     |                                  | 1.0                                    | 30                          |  |  |  |  |

Limits for Maximum Permissible Exposure (MPE)

F = frequency in MHz

Formula:  $Pd = (Pout*G)/(4* \pi *r^2)$ 

Where :

 $Pd = power density in mW/cm^{2}$ ,

Pout = output power to antenna in mW;

G = gain of antenna in linear scale,

 $\pi = 3.14;$ 

R = distance between observation point and center of the radiator in cm

Pd id the limit of MPE, 1 mW/cm2. If we know the maximum gain of the antenna and the total power input to the antenna, through the calculation, we will know the distance r where the MPE limit is reached.

## 2. Test Procedure

Software provided by client enabled the EUT to transmit and receive data at lowest, middle

and highest channel individually.

|                | Output power  | Antenna   | Power Density | Limit                 | Result |
|----------------|---------------|-----------|---------------|-----------------------|--------|
|                | (dBm/W)       | Gain(dBi) | at R=20cm     | (mW/cm <sup>2</sup> ) |        |
|                |               |           | (mW/cm²)      |                       |        |
| 802.11b        | 17.04/0.05058 | 5         | 0.05033       | 1.0                   | Pass   |
| 802.11g        | 16.48/0.04446 | 5         | 0.04424       | 1.0                   | Pass   |
| 802.11n(20MHz) | 16.82/0.04808 | 5         | 0.04785       | 1.0                   | Pass   |
| 802.11n(40MHz) | 14.25/0.02660 | 5         | 0.02647       | 1.0                   | Pass   |

3. Test Result of RF Exposure Evaluation
