4.2 Safety Warming

Driving Traffic Safety first

When driving, do not use the phone. When a

call is unavoidable, use a hands-free accessories. Remember that in some countries the phone while driving is against the law.

➢ On the plane to shut down.

Cell phones can cause interference. Use of mobile phones on airplanes is not only illegal but also dangerous. Make sure that the aircraft during flight will not turn the phone.

➤ In the danger zone to be shut down

In Oil gas station, in the vicinity of mining, chemical plants or blasting activities, to strictly abide by the relevant laws or regulations, turn off the phone.

➤ Comply with the special provisions

To comply with the special provisions, prohibit the use of cell phones at any place or anything that may cause interference or danger please

turned off phone. For example: in the hospital. Special attention should be using the phone near pacemakers, hearing aids and other medical electronic equipment, cell phones may interfere with these devices.

➢ Interference

Cell phone call quality can be affect by interference of radio waves. The device has an internal antenna when the phone is switched

on, if not necessary, do not touch the antenna area (bottom, below the phone's microphone), so as not to affect the communication effect.

➢ Professional Services

Only professionals can install or repair the phone. Self-install or repair phone may bring great danger, but also violate the warranty provisions.

- ➢ Accessories & Batteries

  Use only factory-approved accessories and batteries.

- ➢ Rational use

  Use the phone in the normal way.

- ➢ Emergency Call

  Determine the phone is switched on and in service, enter the emergency number, such as

999 112 or other, point to issue a call by dialing icon. Reported out your location, and a brief description of what happened, without permission, please do not terminate the call.

Note：*Like with any cell phone,due to the network coverage transmission or wireless signals cause,may not necessarily support this phone has features that some networks do not even support 112 emergency call service. Thus, for particularly*

critical communications (eg medical emergencies),
should not rely solely on the phone. Please consult
with a check to the local network operators。

FCC

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over on one gram of tissue.

Device types: I12(FCCID: 2ADWD-I12) has also been tested against this SAR limit. The highest SAR value reported under this

standard during product certification for use at the ear is 0.784 W/kg and when properly worn on the body is 0.463 W/kg. This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 1.0 cm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories

used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of

accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including

interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment .This equipment has been tested and found to comply with the limits for a Class B digital

device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no

guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the

equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

The user's manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications

not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. In cases where the manual is provided only in a form other than paper, such as on a computer disk or over the Internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the

capability to access information in that form
