Attestation for Sugarland Holding Booster FCC ID: 2ADWV-CMB-5B215

To Whom It May Concern:

- 1) Each Signal Booster manufactured under FCC ID 2ADWV-CMB-5B215 is ensured to be FCC compliant and is certified to be compliant.
- 2) This consumer booster is not user programmable, does not require fine-tuning, adjustments, or require professional installation. However, in the case the booster needs to self adjust to be compliant to NPS compliance or safeguard requirements as described in the User Manual, we have built in "fail-safe" guards, as they will not allow the booster to be non-compliant to NPS compliance or safeguard requirements.
- 3) Future software upgrades will not cause non-compliance.
- 4) NPS and other compliance/safeguard features cannot be field reconfigured, disabled or removed and does not require professional installation.
- 5) NPS and other compliance and safeguard features have been implemented. NPS and other compliance/safeguard features are defaulted to be "On" in operation at all times.

Sincerely,

*Robert Skilton*
