2 TEST REPORT SUMMARY

2.1 General

All measurements are traceable to national standards.

The tests were conducted for the purpose of demonstrating compliance with FCC CFR 47 Part 15, paragraph 15.209 and Industry Canada RSS-210 Issue 8.

Tests were performed in accordance with ANSI C63.4-2009.

Radiated tests were made in a semi-anechoic chamber at measuring distances of 3m, 6m and 10m.

A description of the test facility is on file with the FCC and Industry Canada.
