

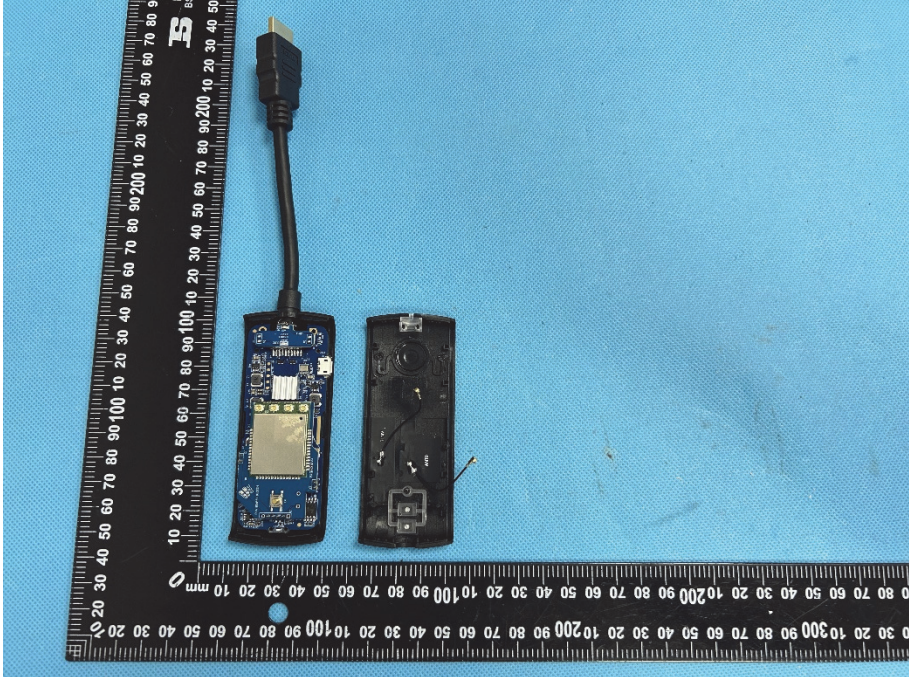

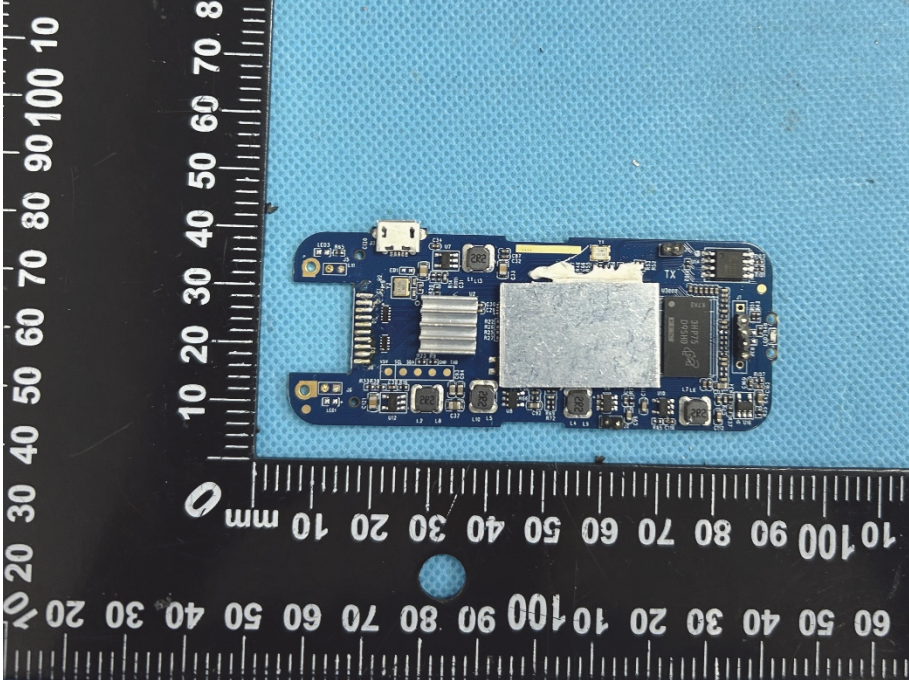

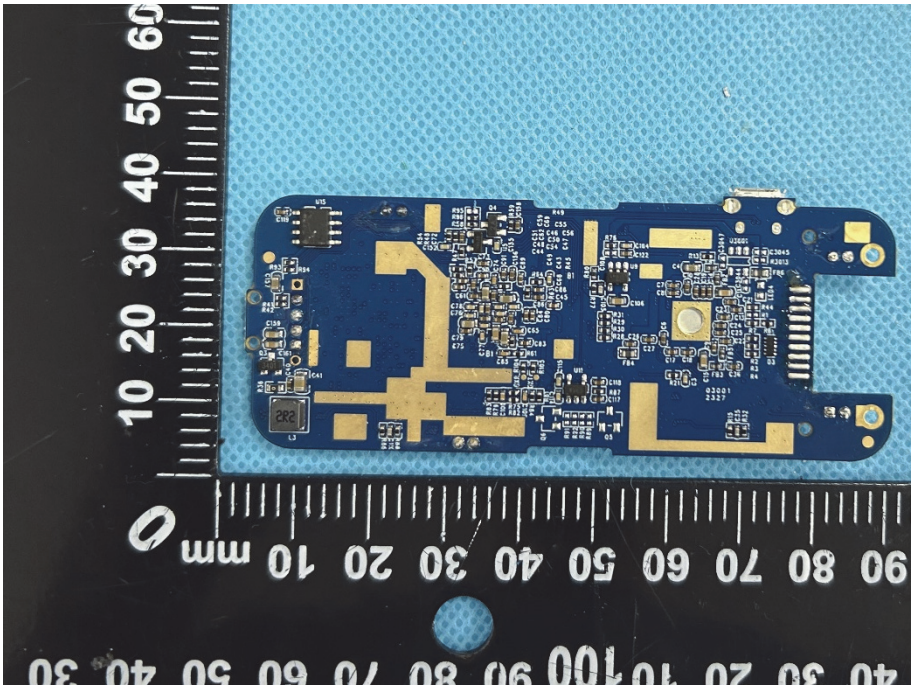

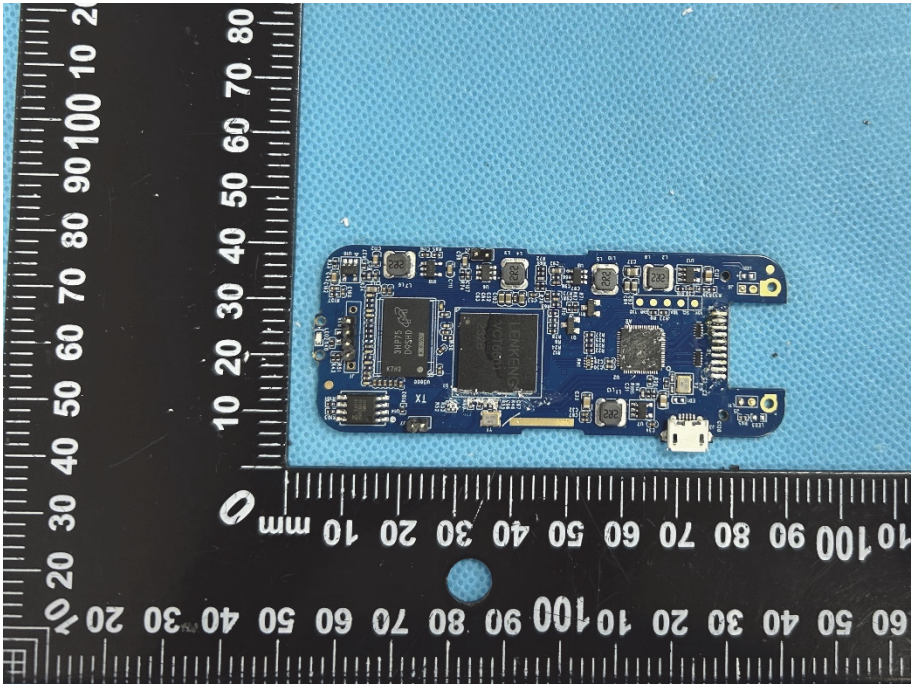

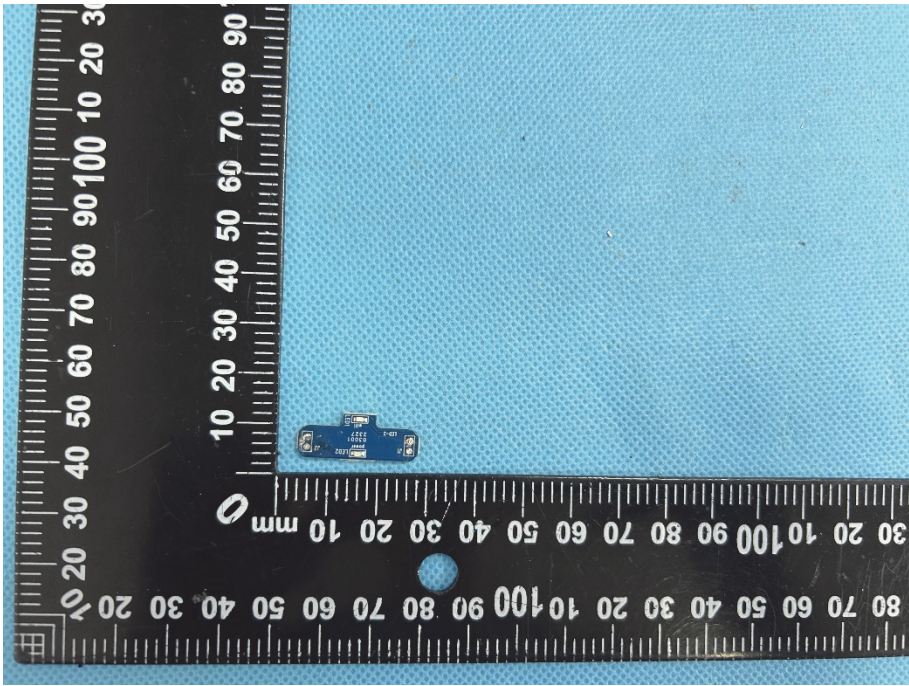

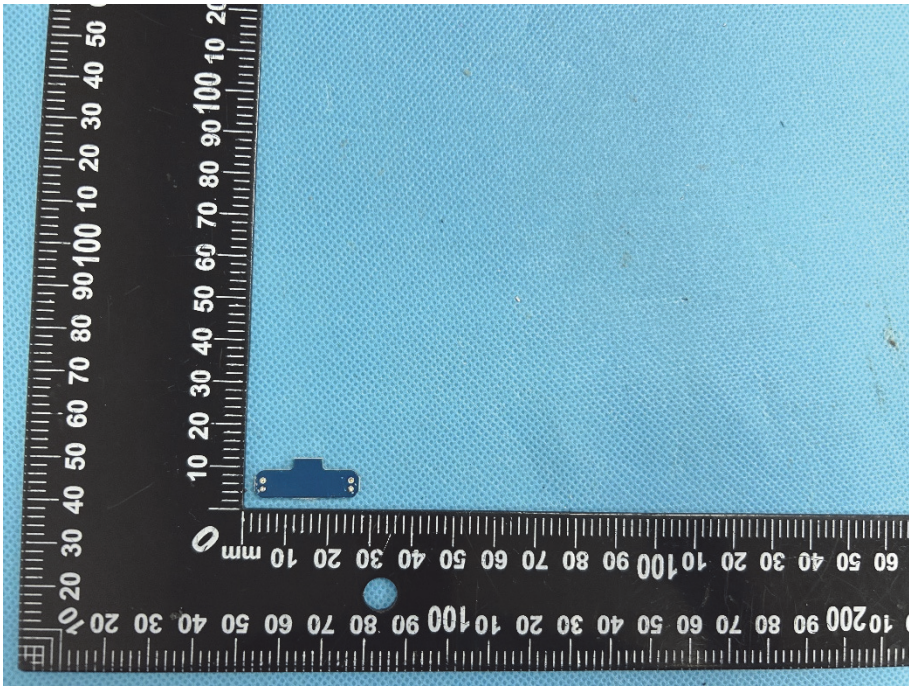

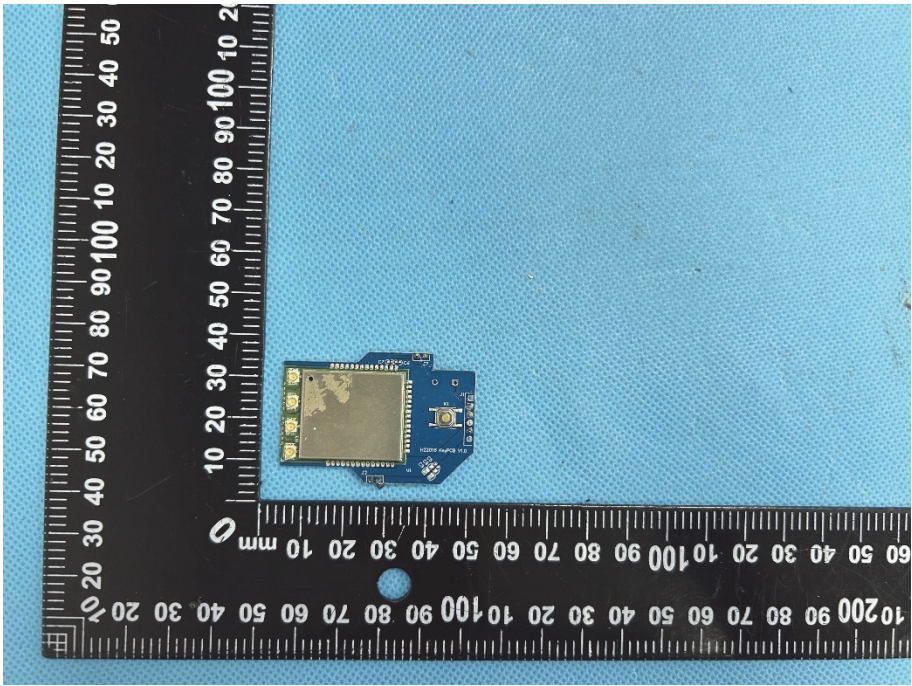

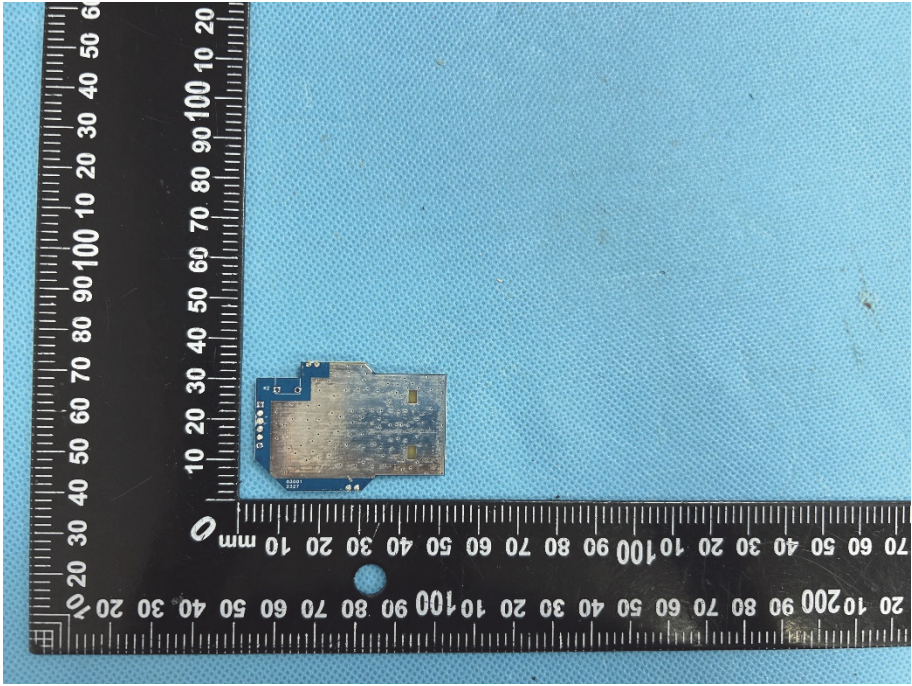

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 <p>A photograph showing the EUT housing and board. The housing is black and the board is blue. A black cable is connected to the board. A ruler is placed next to the components for scale. The ruler shows measurements in millimeters and centimeters.</p>
<p>Solder Board-Component View 1</p>	 <p>A close-up photograph of the solder board-component. The board is blue and shows various components, including a large silver component. A ruler is placed next to the component for scale. The ruler shows measurements in millimeters and centimeters.</p>

<p>Solder Board-Component View 2</p>	 <p>A photograph of a blue printed circuit board (PCB) component, labeled 'View 2'. The board is populated with various electronic components, including a large central chip, several smaller surface-mount components, and a connector on the right side. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board's length is approximately 100 mm, and its width is approximately 40 mm.</p>
<p>Solder Board-Component View 3</p>	 <p>A photograph of the same blue PCB component, labeled 'View 3'. This view shows the board from a different angle, highlighting the central chip and the connector. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board's length is approximately 100 mm, and its width is approximately 40 mm.</p>

<p>Solder Board-Component View 4</p>	 A photograph of a small blue printed circuit board (PCB) component. The component is rectangular with several small components and solder joints on its surface. It is placed on a blue textured surface. A black L-shaped ruler is positioned around the component for scale. The ruler has markings in millimeters, with the horizontal scale at the bottom and the vertical scale on the left. The component is located approximately between the 10mm and 30mm marks on both scales.
<p>Solder Board-Component View 5</p>	 A photograph of the same small blue PCB component from a different perspective. The component is shown from a side-on view, highlighting its thickness and the solder joints on its edges. It is placed on the same blue textured surface. A black L-shaped ruler is positioned around the component for scale, with the horizontal scale at the bottom and the vertical scale on the left. The component is located approximately between the 10mm and 30mm marks on both scales.

<p>Solder Board-Component View 6</p>	 <p>A photograph showing a small, blue printed circuit board (PCB) component with a gold-colored solder mask. The component is positioned on a blue textured surface next to a black L-shaped ruler. The ruler has white markings in millimeters, with the horizontal scale ranging from 0 to 100 mm and the vertical scale ranging from 0 to 100 mm. The component is roughly rectangular with a small protrusion on one side.</p>
<p>Solder Board-Component View 7</p>	 <p>A photograph showing the same blue PCB component from a different perspective. The component is placed on the same blue textured surface next to the same black L-shaped ruler. The ruler's scales are visible, providing a size reference for the component.</p>
