<b>Product Specs:</b>
<b>Wi-Fi:</b> WLAN Built-In Wi-Fi Module; supports IEEE 802.11 b/g/n 2.4 GHz Network (only)
<b>Picture Type:</b> supports JPG, BMP, GIF, PNG files
<b>I/O Interface:</b> USB Port: 1x USB 2.0 port; 1x SD Port x SD/MMC port
<b>Power:</b> Adapter input (AC 100V-240V; 50-60Hz); Adaptor output (DC power output; 5V/3A)
<b>Screen:</b> touch-screen functionality & intuitive UX design
<b>Storage:</b> 4GB of internal storage
<b>Operating Temp:</b> 0°C to 40°C; Storage Temp: -10°C 0 60°C;
<b>Operating Humidity:</b> 10-90% (non-condensing)

## System Requirements:

- 1) Wi-Fi router with a 2.4GHz internet connection
- 2) Android mobile device with OS 4.0 or higher, or Apple mobile device with IOS 8 or higher.

**NOTE:** These products are NOT compatible with Linux or Windows phones or PCs

**NOTE:** This WiFi product will ONLY operate on a 2.4GHz network. If you are operating a 5GHz network, please consult your routers user manual or contact your internet service provider on how to add a 2.4 GHz network.

## What's In The Box?

- 1) Wi-Fi Touchscreen Photo Frame

- 2) Power adapter

- 3) Stand

- 4) User Manual

## PRODUCT FEATURES

### Getting To Know Your Device:

Send pictures from the Mobile Device APP (iOS or Android) to a synced picture frame.

- Pair an unlimited number of phones to 1 frame and/or one phone can control up to 15 frames
- Can transfer up to 10 photos at a time via the app (with unlimited number of total transfers; if you do not have an unlimited data plan, data charges may apply)
- Customize slideshow transition time & style, and/or choose a specific static image to display
- Selectable sleep timer turns display On/Off automatically
- Display photos in original format or resized to fill the screen
- Share photos directly from your mobile device photo album
- Share photos to your Facebook page directly from your frame
- Photos can be stored on frame, SD card or USB drive
- Real time clock can be displayed with user selectable on screen location
- Get notified when new pictures arrive

**NOTE:** These features can be accessed via the Settings Menu

### **IMPORTANT: Before you install your Wi-Fi frame**

- For ease of installation, install your Wi-Fi frame as close to your wireless router as possible.
- If you are going to place your frame more than 20 feet from your router or on another floor you may require a **Life Made** wi-fi extender.

# SETUP AND INSTALLATION

## STEP 1: Wi-Fi Setup

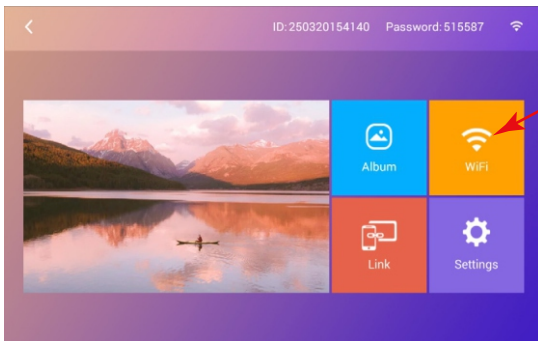

### Setup the Wi-Fi Picture Frame and connect to the Wi-Fi network

- Locate the picture frame as close to the Wi-Fi router as possible, preferably within 10 feet.
- Connect the picture frame to the included wall power adapter and plug the adapter into the wall (the unit will automatically turn on).

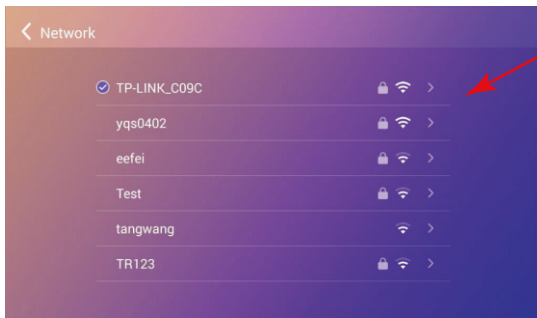

**NOTE:** If the frame changes to the slide show, select the home page by tapping anywhere on the screen.

C) On the home screen, tap the "Wi-Fi" icon to reveal the available Wi-Fi networks.

D) Tap the primary network you'd like to connect the Wi-Fi Picture Frame to.

**Note:** The Wi-Fi connection MUST be a 2.4GHz connection. If your wireless router is setup as a 5Ghz network, you will need to setup a second 2.4Ghz network. See your router manufacturer documentation or contact your internet service provider. There are also many videos on You Tube on how to perform this setup.

E) Enter the Wi-Fi network password and tap “Link” in the app

## STEP 2: Application Setup

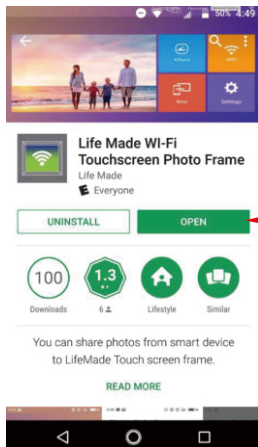

### Connecting Your Mobile Device

- A) Download the App from the Apple App Store or Google Play store.
- B) Search for “Life Made Wi-Fi Touchscreen Photo Frame.”

C)

Android

E)

C) Click the "Get" icon to install the App on your Apple device, or the "OPEN" icon on your android device.

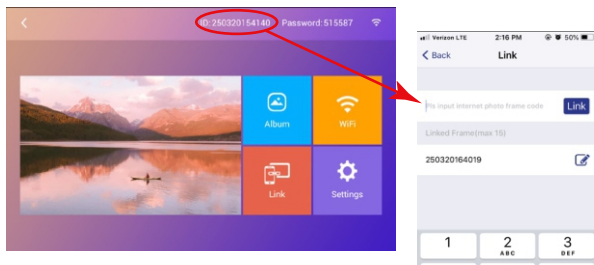

D) Once the installation is complete, open the App by clicking on the Life Made Logo.

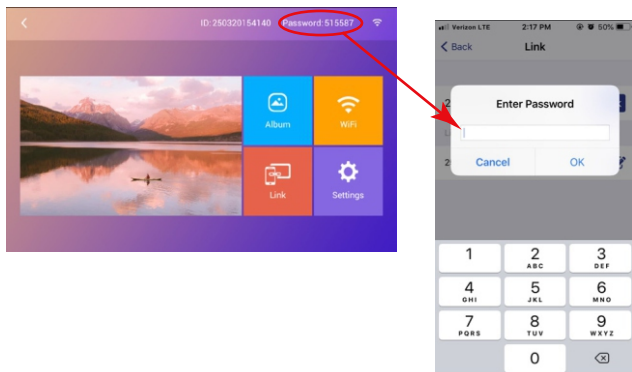

E) Next, tap "Link" in the app

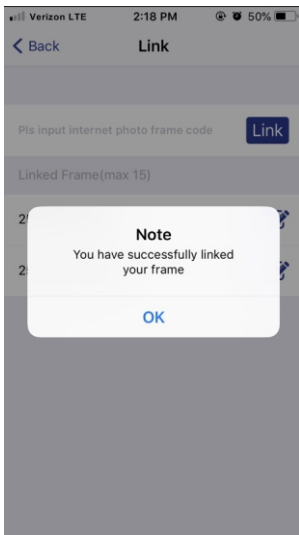

- F) Enter the frame ID number from the home screen of the Wi-Fi Photo Frame and tap “ link ”

- G) You will be prompted to enter password from the frame. Enter the password and tap OK.

H) The App will respond with the following notice after successfully linking of the frame.

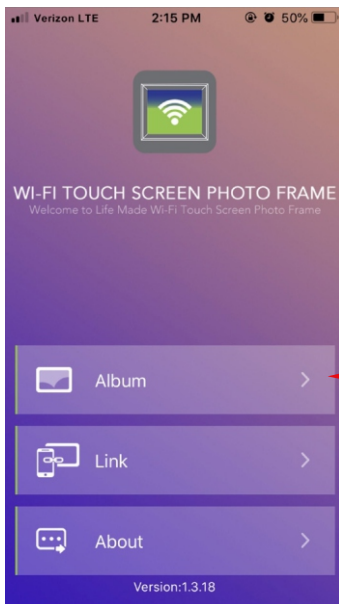

**NOTE:** If you move the frame after installation, check the WiFi icon to make sure the frame is in a location that is receiving a signal from your WiFi router. If there have no bars on your wifi signal strength meter, your WiFi frame will not be able to receive additional photos when sending them from the app. To address this problem you will need a **Life Made** WiFi extender.

# Sending And Viewing Photos

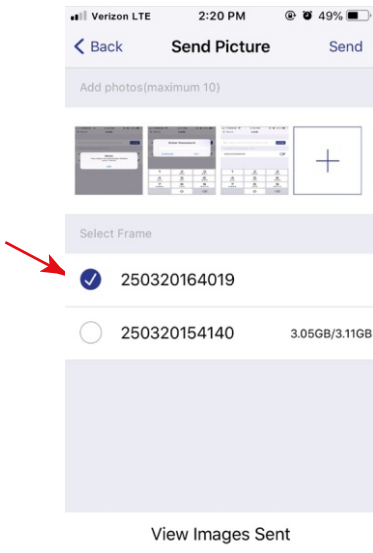

## Step1: Sending photos to the Wi-Fi Photo Frame

Once Setup is complete you may send photos from your mobile device to the frame.

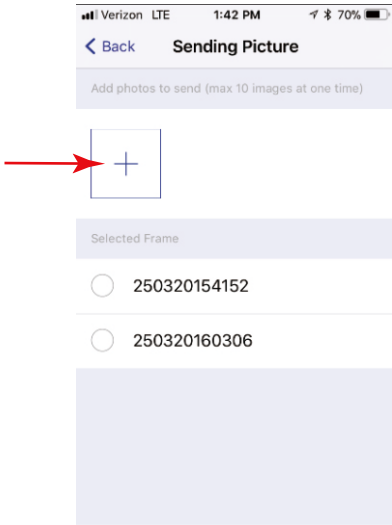

A) From the App main menu, tap the “Album” menu item.

B) Next, select the frame you want to send the photos to by tapping the radial button next to your frame I.D. number. If multiple frames have been “Link” to the app you can select additional frames by tapping the radial button next to each frame.

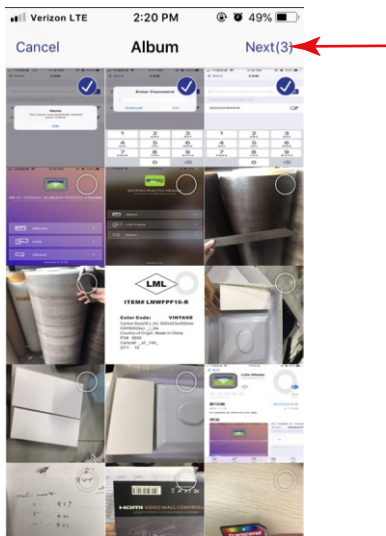

C) Now select the photo(s) you want to send by tapping the “+” icon.

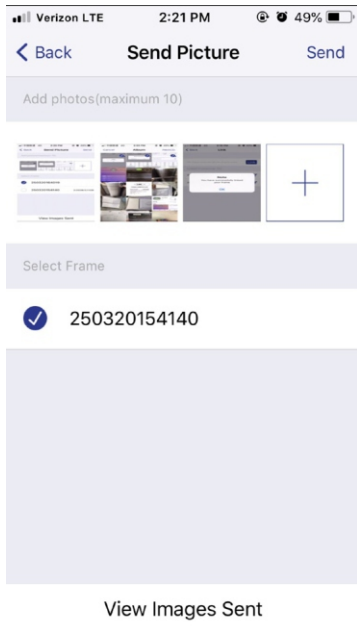

processing notice

- D) Select the photo(s) by tapping each desired photo from your device's album. A blue checkmark will appear for each photo selected. Tap the "Next" icon at the top right corner of the app to complete your selection.

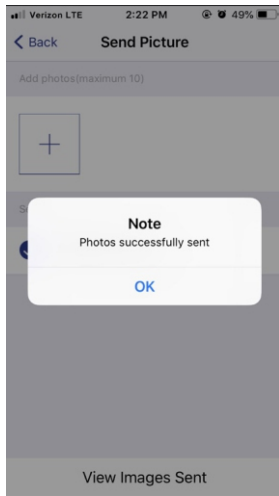

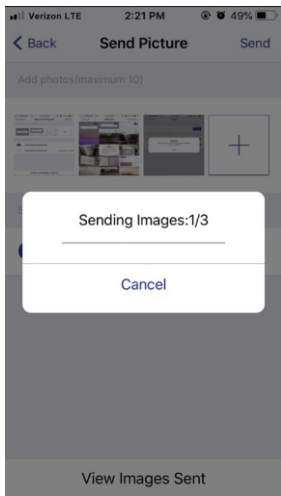

**NOTE:** There is a limit of 10 photos per each transmission to the frame. This ensures smooth, successful transmission from mobile device to the frame.

E) The App will return to the “Send Picture” screen as shown. Press the “Send” icon at the top right of the App to send the photos.

F) The App will display the following messages indicating the photos were sent to the frame.

## VIEW THE PHOTOS ON THE WI-FI PHOTO FRAME

Once the frame receives the photos, you will see a notification on the display that new photos were received. The new photos will be inserted at the top of the slide show and be displayed in sequence.

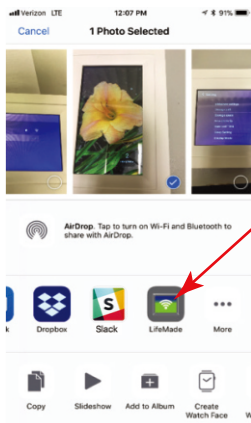

When there are many photos in the slide show, you can skip to the new photos by tapping on the “New Photo” icon in the slide show. This will cause the unit to start the slide show at the top thereby displaying the new photos.

## SENDING PHOTOS DIRECT FROM A PHOTO ALBUM

Photos can be sent to the Wi-fi Touchscreen Photo Frame directly from your device's photo album.

### For iOS device users:

Display the camera roll and tap the "Send" icon

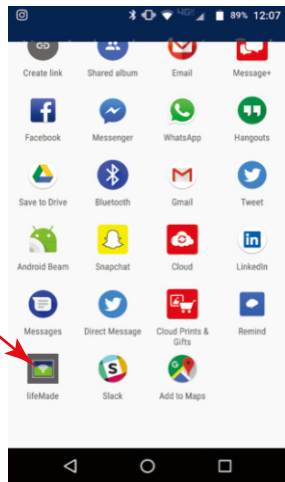

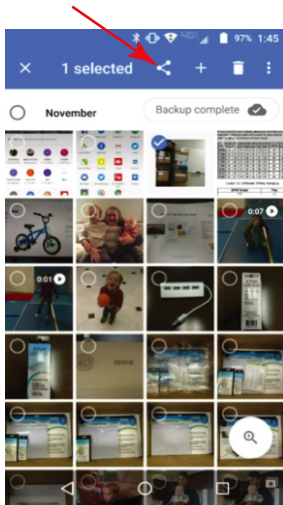

Select the photo(s) for transfer, then tap the LifeMade Icon and then tap "Post". The Life Made App will open the Sending Picture screen to select the frame and send the photo. If the Life Made App logo does not initially show, press the "More" icon to add it.

## For Android Devices:

Access the photo album on the device and select the photos to transfer.

Then tap the "Share" icon.

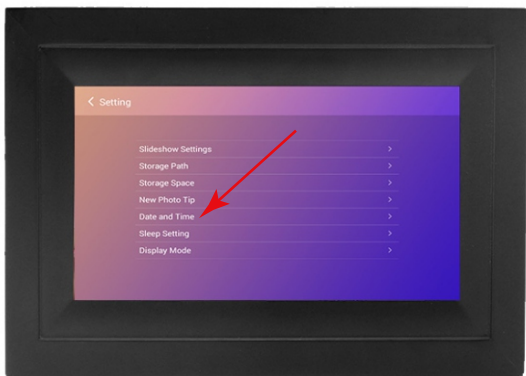

Tap the LifeMade Icon and then tap "Post".

The Life Made App will open the Sending Picture screen to select the frame and send the photo.

## Settings / Options

Other features and settings can be accessed via the "Settings" option from the main menu. The main menu can be obtained by tapping anywhere on the display.

## From here you can;

- Change the way the frame transitions from one photo to the next
- Select where the photos are displayed from: The frame's built in memory, a USB drive or SD card (supports up to 64G)
- Display the remaining memory in all storage devices
- New Photo Tip will allow you to select how long the "New Photo" icon is displayed when new photos are received
- You can select the date and time settings and set the date and time as well as select the time zone the photo frame is located
- The sleep timer can be set to put the frame to "sleep" to conserve energy. To set the sleep timer, from the settings menu, select the "Sleep Setting" menu. You will see a time wheel. Press your finger and drag it from the point you want your photo frame to turn off and let go when you want it to turn on again. You can have multiple OFF/ON times however never shorter than one hour on and one hour off.
- Slideshow Settings allows you to select how your photos are transitioned from one to the next
- Display Mode allows you select how to show the photos; either in the original format/size, or full screen

**Note:** Due to the original photo resolution and format, some photos may **NOT** be able to fill the entire screen.

**We encourage you to experiment with the settings as there are many options available.**

## FCC WARNING STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

## Digital Gadgets Limited Warranty Statement

Digital Gadgets warrants this product against defects in workmanship and material for a period of 12 months from the original date of purchase. If the product fails during normal and proper use within the warranty period, Digital Gadgets will repair or replace any products or parts determined to be defective in workmanship or material at its option. All components repaired or replaced by Digital Gadgets' service will be under warranty for the remaining warranty period.

This Limited Warranty covers only the accessory components packaged with this product. This Limited Warranty does not include failure caused by improper installation, operation, cleaning or maintenance, accident, damage caused by extreme temperature, humidity or extreme electrical stress, misuse, abuse, modifications to the product, software faults, normal wear and tear or any other event, act, default or omission outside of Digital Gadgets' control or if the unit casing has been opened. Any attempt to repair this product will void your limited warranty.

### Support

If you are having problems with your product, please contact customer support before contacting your retailer.

To obtain warranty service, please contact Digital Gadgets for specific instructions at the telephone number below. Dated, documented proof of the original purchase is required.

Digital Gadgets customer service representatives are available by calling Digital Gadgets at 866-843-6460
