2. When playing music, the bluetooth speaker disconnect and shutdown suddenly, then can't turn on the speaker or the light out after some minutes lighting, that is low battery, please charge it.
3. When the product is playing music via Bluetooth technology, the music may caused intermittent or noise because of the environment or the source device (such as mobile phones) interference or software incompatibilities etc... Please adjust the distance between the music device and the unit, or restart the unit's power supply or restart the music device or change to other music source to have better sound performance.
4. When the product is during a call via Bluetooth technology, the conversation may be intermittent or noise, or phone off because of the environment or the network signal interference or poor etc... Please adjust the distance between the phone and the unit, or change to other calling device, or restart the unit's power supply etc. to improve the calling quality.
5. When DC5V is for power supply, the power supply current should be more than 1A.
6. If it is stopped using for a long time , pls make sure it is full charged.
7. The product built-in rechargeable lithium battery, please do not pollute the environment when discarded, try to classify recycling.
8. The product should be used for the first time after the battery is fully charged.

FCC statements:

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or changes to this equipment. Such modifications or changes could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
