- Bluetooth® speaker x 1
- Standard USB to micro USB cable x 1
- 3.5mm to 3.5mm Audio cable x 1
- USB Manual x 1

About your speaker

The Color Glow Bluetooth® Speaker is a wireless device featuring intelligent voice prompt function. It searches for and pairs with Bluetooth® devices automatically after startup. It enables the user to answer calls from a mobile phone.

Charging your speaker

Before first use, charge your speaker for 2 – 2-1/2 hours by connecting the micro USB plug into the speaker to the standard USB plug to your computer or other USB port with a power supply.

Buttons and Interfaces

1. Answer/Reject Call - Press this button to answer the call, and press it again to end the call. To reject the call press and hold.
2. Composite function button + - Press this button to select next track in the playlist. Press and hold to increase volume level.
3. Composite function button - Press this button to select previous track in the playlist. Press and hold to reduce volume level.
4. Press and hold for 2 seconds to switch on/off.
5. AUX input - Connect the speaker to audio players via audio cable. Insert the cable into AUX input and into the output of your player device.
6. Reset - Reset switch after protecting overcharging and short-circuit.
7. LED Indicator - Indicator for the power charging.
8. USB charging - To connect MICRO USB 5V power supply for charging.

Connecting your speaker

1. When you switch on the device for the first time, it will search for nearby Bluetooth® devices automatically and enter standby mode. Please enable the Bluetooth® function of your device.
2. Open the Bluetooth® set up of your device and select “Crystal-01” from the list, if requested.
3. Some devices require to digit a Pin Code, in this case digit “0000”.
4. When you switch on the device next time, the speaker will search for and pair with the last connected Bluetooth® device automatically. If no device is found, the speaker will enter standby mode waiting for other Bluetooth® devices to find it and connect with it.

Technical features:

1. Bluetooth® 3.0, crystal body with LED inside
2. Power Output: 3W*1
3. Long Distance Transmit up to 10m
4. Frequency Range: 100Hz-20KHz
5. Support MP3/WMA/WAV etc.
6. SN Ratio: ≥70dBA
7. Unit dimensions: 62*62*69mm

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
