ATake Digital Technology (Shenzhen) Co., Ltd.

A home theater speaker system that looks as good as it performs

ATake Bluetooth Tower speaker (Pair) represent a bold new approach to design while delivering excellent performance that will please even the most discriminating listeners. The precise imaging, wide soundstage, and dynamic range are impressive when compared to other surround sound systems in this price range. Best of all, the slim elegant design won't dominate a room or cramp smaller home theaters.

ATake Bluetooth Tower speaker (Pair) is the ideal choice for anyone who wants an elegant surround sound audio system that matches cutting edge design with precision performance, and surprising affordability.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
