Attention: Reviewing Engineering

Reference: Certification: FCC 47CFR Part 15 Subpart C Section 15.231
 Applicant: IntelliSAW, Inc.
 Equipment: Interrogator Module
 Model #: 400.00152
 FCC ID: 2AEAE-ISAW-RF-H0215

Dear Sir/Madam:

Enclosed please find a FCC 47CFR Part 15 Subpart C Section 15.231 certification application for a Class II Permissive Change of the IntelliSAW, Inc. Interrogator Module, Model #: 400.00152 which was originally approved under certification FCC ID: 2AEAE-ISAW-RF-H0215 on 2015-06-11.

There are no electrical changes to the Interrogator Module (Model #: 400.00152). The only change made was a firmware setting that can be applied by a professional installer to reduce the transmitter output power, allowing the equipment to function outside of the metal enclosures defined in IEEE 37.20 standard indicated in the original filing. The firmware settings require two levels of security and professional installation in order to make changes. The electrical characteristics and functionality of the equipment has not changed and therefore still qualifies for certification.

Further details and supporting documents are attached.

Should you have any questions, please feel free to contact the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey Andle", with a long horizontal flourish extending to the right.

Jeffrey Andle
Vice President of Research and Design
IntelliSAW Inc.
