Date: 2 January 2024

Subject: Request for **Permanent Confidentiality**

FCC ID: 2AEAK8910B1-11

To Whom It May Concern:

In accordance with §0.457(d) and §0.459 of CFR 47, and KDB 726920, Rosemount Aerospace Inc. hereby requests permanent confidentiality for documents filed under the following exhibit types:

1. Block Diagram
2. Schematic Diagram
3. Part List
4. Operational Description
5. Internal photos
6. User Manual

These items contain detailed system and equipment description and related information about the product which *Rosemount Aerospace Inc.* considers to be proprietary, confidential trade secrets and a custom design which otherwise would not be released to the general public. Furthermore, these items are only made available to a customer or partner under NDA. Since this design is a basis from which future technological products will evolve, *Rosemount Aerospace Inc.* feels that this information would be of benefit to its competitors, and that the disclosure of the information in these exhibits would give our competitors an unfair advantage in the market.

Internal photos are requested to be held in permanent confidentiality for the following reasons. The circuit board and internal components are not accessible to users. Only certified personnel are allowed access to the device per CFR Title 14, Chapter I, Subchapter H, Part 145. These procedures restrict public access to the product. The certified personnel in *Rosemount Aerospace's* repair station are the only persons granted access to the device, thus confidentiality of internal information is ensured. Internal photos would provide the market with proprietary construction and component information.

The User Manual contains proprietary technical information and is not distributed or disclosed outside of Collins Aerospace.

We are aware that exhibit types cover letters, attestations, label document, test reports, RF exposure information (SAR and MPE reports), cannot be requested to be classified confidential
