

Difference Statement

Model: E501, E5011

The PCB Layout of the two models is the same. The difference is that the power of "E501" is 300W, the length of the heating pipe is 260mm, and the weight is 1.3kg. "E5011" has a power of 500W, a heating tube length of 315mm and a weight of 1.4kg. We chose the maximum power model E5011 for RF testing.
