Inquiry on 06/20/2018 :

Inquiry:

Dear Sir/Madam,

This is peter geng from SGS shenzhen. I got a wireless charger to apply certification per FCC part 18.

The specification of the wireless charger is below:

operation frequency: 129.7-182.6 kHz

the number of turns: 10

the max output power: 10W

The wireless charger contains a built-in rechargeable battery. It can be used as an portable device. So it is not covered in KDB 680106 app v03. And I made the tests with a distance from 4cm to 15cm between the edge of the wireless charger and the center of the test probe. Test report and Setup have been submitted. Could you help to check if it is acceptable or any other to improve? Thank you very much and looking forward to you.

---Reply from Customer on 06/29/2018---

Dear Sir/Madam,

The external and internal photos of the wireless charger have submitted. Could you help to review it and advise if the RF exposure evaluation report is acceptable? thank you very much and looking forward to your reply.

---Reply from Customer on 07/03/2018---

Dear Sir/Madam,

May I have your comment?
