

FM Declaration Letter

FCC ID: 2AEFF-F32

1) How the device operate?

Insert the car charger into the cigarette lighter port. The device shows “power on” and the orange light will start flashing.

2) Provide product information and its antenna.

- Transmitter Dimension: 78x46x18mm
- Charger Dimension: 88x21x34mm
- Color: Black
- Display :frequency and Bluetooth connection status
- IC :AC3290
- Input Voltage: 12~24V
- USB Output: DC 5V/2.1A
- Frequency Range: 88.1~107.9MHZ
- Working Temperature: 0°C-45°C
- Bluetooth chipset: CSR BC 8615 V4.0
- Antenna Designation: Wire antenna
- Antenna Gain(Peak): 0 dBi

Its antenna is fixed on the PCBA board.

3) How is it installed?

Insert the car charger into the cigarette lighter port(12-24V).

4) What is the test procedure used?

ANSI C63.4-2003

5) If installed in a car, how is it configured?

Insert the car charger into the cigarette lighter port(12-24V).

6) Was the tuning range properly verified?

Yes. It is verified.

7) Was the bandwidth properly tested with max. audio signal input?

Yes. It is tested.

8) Provide test report? (Report No.)

NTEK-2015NT0303400F3
