## 2 Specifications

Type	JH08 IR
Network Interface	WiFi (IEEE802.11b/g/n)
CPU	32bit RISC SoC Processor
Image Sensor	1/4"Color CMOS Sensor1.3 Megapixel
Image Resolution	HD 720P(1280*720), WVGA(854*480)
Camera Lens	Aperture F2.8, 127° wide angle
Video Compression Format	H.264
	Built-in microphone and speaker, voice monitor, snapshot, motion alert
Memory	TF Card(Max 32G) local storage and cloud storage server
Working Status Indicator	Constant bright (AP setting mode) Slow flashing (WIFI mode)
Power Input	5V/1A, USB Interface
Dimensions	50 (L) ×50 (W) ×98 (H) mm(with base) 40 (L) ×36 (W) ×89 (H) mm(without base)

### 3 Structure

- ① Camera
- ② LED indicator
- ③ Mic
- ④ Magnetic base
- ⑤ Power input
- ⑥ Speaker
- ⑦ Micro SD slot

#### 3.2 LED indicator status

Status	Meaning
Blue constant on	AP setting mode
Blue flashing slow	WIFI connection normal

## 4 Operation

### 4.1 Connect with power

- 1) Connect with the power cable and charger
- 2) The Blue LED indicator will be flashing slowly if the device is connected successfully with the WIFI network. If the Blue LED is constant on, it means the WIFI network is not set correctly or there is no WIFI, and it will enter into AP setting mode.

### 4.2 Fast setting

#### 4.2.1 APP

Please download APP from APP store or at [www.jimilab.com](http://www.jimilab.com).

#### 4.2.2 WIFI setting

- 1) When the device is ON with Blue LED in constant bright status, connect to a available WIFI in your phone setting.
- 2) Start APP on your phone, create account and login.

3) After effective connection, click  to add camera.

4) Select WIFI and confirm by clicking  ;

The screenshot shows a mobile application interface for selecting a WiFi network. At the top is a black status bar with various icons and the time 20:39. Below it is a white header bar with a back arrow on the left, the text "Select WIFI" in the center, and a checkmark icon on the right. The main content area features a blue circular icon of a camera. Below this is a text input field containing "Hello\_World" with a dropdown arrow on the right. Underneath is a password input field with seven dots and an eye icon on the right. At the bottom is a checkbox labeled "Remember", which is currently checked.

Select your camera and start setup.

## 5 Installation

You can put the device on a flat surface with the magnetic base or install it on the wall or the ceiling. Please check the details as below:

Notice: a. Before installation, please make sure the device is close to the power socket.  
b. Before secure the pin and the screw, please drill holes on flat and solid surface.

### 5.1 Wall mounting

5.1.1 Remove the pin from wall-mount; Push the pin according to the position as below.

#### 5.1.2 Drill holes

Drills holes on the wall according to the position of the pin holes.

#### 5.1.3 Secure the pin to the wall

Place two setscrews into the holes, then secure the pin to the wall with the two screws.

5.1.4 Secure the device on the wall mount; Secure the device and the pin.

#### 5.1.5 Secure the wall mount to the pin

### 5.2 Ceiling installation

Notice: Please set “Video flip” in the APP’s “Camera setting” if installed in on the ceiling, otherwise the image will be back side down.

#### 5.2.1

Use a slot type screwdriver to take out the top cover gently and review the screw hole.

5.2.2 Drill holes on the ceiling according to position of the magnetic base.

5.2.3 Secure the magnetic base onto the ceiling

Use one setscrew and one screw to secure the magnetic base to the ceiling.

5.2.4 Press back the circle top cover

5.2.5 Place the device onto the magnetic base, and then adjust the angle to a proper position.

## 6 Trouble shooting

During operation if any problem appears, please read the following table and contact your local supplier if the problem remains unsolved.

Common errors	Possible Causes	Solutions
<b>Connection failed</b>	Device not in WIFI	Confirm the device is connected to WIFI successfully
	WIFI network error	Check WIFI status
	Phone network error	Make sure your phone can access internet
<b>Cannot receive motion detect alarm messages</b>	Motion detect not activated	Activate motion detect function
	Not login to APP	Make sure the APP is running or running in backstage
<b>Micro SD error</b>	No SD card	Insert SD card
	Micro SD card fail	Replace or format the card
<b>Live view black screen or replay failure</b>	Bad network connection of cellphone	Improve network condition

## **FCC Statement**

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### **NOTE:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

A minimum separation distance of 20cm must be maintained between the user and the product
