How to use this manual?

Please refer to each chapter for the details.

What can you get from your agent or system administrator?

- You may ask your agent or system administrator about the following issues: Install the Universal Interface Cover
- Does vour Handheld Transceiver (HT) have default channels? · Which buttons can be used to access other functions?
- · Which optional accessories do you need?

This manual describes basic operations on an HT. Your agent or system administrator may have customized your HT to address your special needs. For details, contact your agent or system administrator.

Ready to Use the HT

Perform the following steps to assemble your HT:

Charge the battery

Install the battery. Install the antenna

Install the belt clip.

Install the universal interface cover.

Turn on the HT.

Adjust the volume.

Charge the Battery

The HT is powered by a Li-Ion battery. To protect the battery from damage and comply with the warranty conditions, you can use only the charger provided with the battery for charging. To maximize battery performance, it is recommended to charge the battery for 14 to 16 hours before the first use.

Install the Battery

Align the battery with the battery slot on the rear side of the HT. Push the battery into the slot until it is fastened. Before removing the battery, turn off the HT first. Press the battery fastener, and then remove the battery

Install the Antenna

Turn off the HT, place the antenna into the installation hole, and turn the

To replace the antenna, use a specified antenna to replace the old one.

Align the screw holes on the belt clip with those on the rear side of the HT.

The universal interface is on the antenna side of the HT. It connects an

universal interface slot. Press the cover, so that it is fastened to the RF

4. Wait until the call admission tone (if activated) ends, and speak to the

5. Release the PTT button to listen. When the target HT responds, the LED indicator is lit green.

6. If the "idle channel prompt" function is enabled, when the target HT releases the PTT button, you will hear a short prompt sound, indicating that the channel becomes idle, and you can respond. Press the PTT button to respond. If no one talks within a specified period, the call ends.

Initiate a General Call

This function enables you to transmit signals to all the users on the same channel. You must enable this function on your HT before using this function. Perform the following steps:

- 1. Turn the channel selection knob, and use an activated general call group ID for selecting a channel.
- 2. Hold the HT vertically, and keep it about 1 to 2 inches (2.5 to 5.0 cm) away from your mouth.
- 3 Press the PTT button to initiate a call. The LFD indicator is lit red
- 4. Wait until the call admission tone (if activated) ends, and speak to the microphone. Other users receiving the general call cannot respond to the

Initiate a One-Press Group Call or Private Call

The one-press call function enables you to call a predefined group ID or user ID by pressing one button. This function can be assigned to a press operation or a press-and-hold operation on a programmable button. You can assign only one ID to one programmable button. There are multiple programmable buttons for the one-press call function. Perform the following steps

- 1. Press a pre-programmed button to call a predefined group ID or user ID. 2. Hold the HT vertically, and keep it about 1 to 2 inches (2.5 to 5.0 cm)
- away from your mouth.
- 3. Press the PTT button to initiate a call. The LED indicator is lit red.
- 4. Wait until the call admission tone (if activated) ends, and speak to the microphone.
- 5. Release the PTT button to listen. When a target HT in the call responds, the LED indicator is lit green.
- 6. If the "idle channel prompt" function is enabled, when the target HT releases the PTT button, you will hear a short prompt sound, indicating that the channel becomes idle, and you can respond. Press the PTT button to respond. If no one talks within a specified period, the call ends. When a private call ends, you will hear a short prompt tone.

9

Advanced Functions

You can use the following advanced functions:

Scan list.. Scanning..

SMS... Settings.

Scan List

You can create a scan list and assign it to a single channel or call group The HT scans the channel or call group queue in the list on a cycle basis to check whether someone is speaking on the current channel. The HT supports a maximum of 250 scan lists, and each list supports a maximum of

(3)

Scanning

When you start scanning, the HT scans the pre-programmed scan list on a cycle basis to check whether someone is speaking on the current channel.

The LED indicator is flashing red. Scanning modes

- Main channel scanning (manually): The HT scans all the channels or call groups in your scan lists. Depending on the configuration, your HT may start scanning from the last scanned active channel/user group or the channel for which scanning is enabled
- Automatic scanning (automatically): When you select a channel or call group for which automatic scanning is enabled, the HT automatically starts scanning.

Start and Stop Scanning

Perform the following steps:

- 1. Press the pre-programmed scan button. Or turn the channel selection knob to select a channel for which automatic scanning is enabled.
- 2. When scanning is started, the LED indicator is flashing red, and you will hear a positive prompt tone. When scanning is stopped, the LED indicator is not lit, and you will hear a negative prompt tone.

When the HT detects an active channel

The HT stops at the detected active channel or call group. The HT stays on this channel for a pre-programmed duration call "idle time".

Perform the following steps: 1. Hold the HT vertically, and keep it about 1 to 2 inches (2.5 to 5.0 cm) away

10

2. Press the PTT button within the idle time. The LED indicator is lit red.

3. Wait until the call admission tone (if activated) ends, and speak to the

5. If you do not respond within the idle time, the HT continues to scan other channels or call groups.

Send a Predefined Short Message

You can use a pre-programmed button to send a short message predefined by your agent. Perform the following steps:

- 1. Press a pre-programmed button to send a predefined short message to a predefined ID.
- The LED indicator is lit red.
- 3. If the HT gives two chirps, it indicates that the short message is successfully sent. If the HT gives a low-pitch prompt tone, it indicates that the short message fails to be sent.

Settings

Set the Noise Reduction Level

You can adjust the noise reduction level to block useless calls with low signal strength or channels whose background noise levels are higher than

The default level is set to normal. With large noise reduction, the HT blocks useless calls and background noise. Calls from remote locations may also be

Perform the following steps:

- 1. Press the pre-programmed noise reduction button.
- 2. If you hear a positive prompt tone, it indicates that large noise reduction is applied. If you hear a negative prompt tone, it indicates that normal noise reduction is applied.

Set the Power Level

You can set the power level for each channel.

If a high power level is set, the HT can communicate with HTs at a far distance. If a low power level is set, the HT can communicate only with HTs at a close distance.

Perform the following steps:

- 1. Press the pre-programmed power level button.
- 2. If you hear a positive prompt tone, it indicates that the HT operates at a power level. If you hear a negative prompt tone, it indicates that the HT operates at a high power level.

(11)

- Encryption: enables or disables the encryption function for digital channels.
- · Scanning: enables or disables scanning.
- VOX: enables or disables the VOX function
- Zone: changes the current zone of the HT.

Assignable Setting Functions

- Tone/prompt: enables or disables the tone/prompt function. Power level: switches between transmitting power levels
- Noise reduction: switches between large noise reduction and normal noise reduction

PTT Button

Each channel can be configured as a digital channel.

- During a call, if you press the PTT button, the HT transmits signals to other HTs in the call. Press and hold the PTT button to talk. Release the PTT button to listen to other members in the call. When you press the PTT button, the microphone is activated.
- If there is no existing call, you can press the PTT button to initiate a call (for details, refer to the Initiate a Call section), If the call admission tone function is activated, wait until the short prompt tone ends. During a call, if the "idle channel prompt" function is enabled
- (preprogrammed by your agent), when the target HT (that receives your call) releases the PTT button, you will hear a short prompt tone, indicating that the channel becomes idle, and you can respond. If the existing call is interrupted (for example, when you receive an
- emergency call), you will hear an idle channel prompt tone. You can disable the "idle channel prompt" function by disabling the tone/prompt function (for details, refer to the Enable or Disable the Tone/Prompt

Status Indicators

You can learn about HT operation through the following

LED indicator. Prompt tone..

LED Indicator

The LED indicator indicates operation of the HT.

- If the indicator is lit green, it indicates that the HT is being turned on, or
- receiving a call or data.

• If the indicator is lit red, it indicates that the HT is transmitting signals.

Prompt Tone

Prompt tones can help you learn about the HT status or response to data

- Continuous tone: The HT gives a series of single tones continuously. · Periodic tone: The HT gives a tone periodically based on the specified
- cycle. The tone is automatically started, stopped, and repeated. Repeated tone: The HT gives repeated tones until you end it.
- Momentary tone: The HT gives a tone for a duration specified by the HT. High-pitch prompt tone
- Low-pitch prompt tone
- Positive prompt tone
- Negative prompt tone

Receive and Initiate a Call You can use your HT after learning how to configure the HT.

Get familiar with the basic call function as follows: Select a zone..

Select a channel, a user ID, or a call group ID.. Receive and respond to a call.

Select a Zone

the last zone in the list.

Initiate a call..

A zone defines a channel group. The HT supports a maximum of 250 zones, and each zone supports a maximum of 16 channels Perform the following steps:

1. Press the pre-programmed zone button. 2 If you hear a positive prompt tone, it indicates that the HT switches from current zone to the next zone in the zone list. If you hear a negative prompt tone, it indicates that the HT switches from the current zone to
