

Product Difference Statement

The schematic and PCB of the two models ONE402M and ONE404M used by our company for the certification application is completely the same , and the HW&SW used is the same. Because the product is sold in different market using different models eSIM , different models are named. The differences are as follows:

ONE402M uses eSIM of Kore;

ONE404M uses eSIM of Twilio.

Hereby declare.
