

### EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

---

**Conducted Emission  
Test Setup**

**Radiation Emission Test  
Setup (Below 30MHz)**

<p><b>Radiation Emission Test Setup (30MHz to 1GHz)</b></p>	A photograph of an anechoic chamber for a radiation emission test. The walls are covered with white, square-shaped pyramidal absorbers. In the center, a white table stands on a circular turntable. To the left, a metal safety railing with several vertical posts is visible. The floor is a light-colored metal plate with yellow and black diagonal hazard stripes.
<p><b>Radiation Emission Test Setup (1GHz to 18GHz)</b></p>	A photograph of an anechoic chamber for a radiation emission test. The walls are covered with white, square-shaped pyramidal absorbers. In the center, a white table stands on a circular turntable. A red, fan-shaped absorber is positioned in the foreground, partially obscuring the view. The floor is a light-colored metal plate with yellow and black diagonal hazard stripes.

**Radiation Emission Test Setup (Above 18GHz)**
