---

## Tune up procedure

FCCID:2AENNUHD

1. It must provide an operational voltage (3.4~4.2V DC) to turn on the 4K UHD video camera and on one certain channel in service mode by means of company proprietary software.
2. The maximum AV output power of each individual 4K UHD video camera are adjusted until the target value met.

For WIFI MODE

IEEE 802.11b

max possible output power(AV): 8.0 +/- 1dbm

IEEE 802.11g

max possible output power(AV): 8.07 +/- 1dbm

IEEE 802.11n(20M)

max possible output power(AV): 8.15 +/- 1dbm

the highest power level is verified afterwards in a measurement on three channels (low, middle and high).
