Dear Sir or Madam:

The RF chip installed in our product BT MIKE (model name: BT MIKE, FCC ID: 2AEOCPC214), only BT (GFSK,  $\pi$  /4-DQPSK) and BLE 1M functions were activated, the other functions are disabled by using the software and the end user cannot activate them.

Please contact me if there is need for any additional clarification or information.

Best Regards,

Sincerely Yours,
