

RE: Dual Antenna Port Letter

To whom it may concern:

Regarding the dual antenna feature of the product, the manufacturer declares that simultaneous transmission on multiple antenna ports is not a permitted operational mode. Furthermore, transmission in multiple simultaneous bands of operation is not a permitted operational mode.

Therefore, the RF exposure assessment including standalone, single port, single band configurations remains applicable for product compliance.

Signature:

A handwritten signature in black ink, appearing to read "Michelle Branum", with a stylized flourish at the end.
