※Possible Problems

Why the gamepad can not be identified on computer?

1. Make sure your computer USB port is working.
2. USB voltage is not stable because of short power supply of computer.
3. Try another USB port.
4. Need to install X360 gamepad software for systems below WinXP (including XP).

Why the gamepad does not work in games?

1. The game does not support gamepad.
2. Set the gamepad mode in the game before using.

Why the gamepad does not vibrate?

1. The game does not support vibration
2. Vibration function is not open in game setting.

Other

1. When the gamepad can not be turned on, it may be because of no battery, please use USB cable to charge the gamepad.
2. When the gamepad was crashed or disconnected, please keep the device at effective distance, or reconnect.
3. Factory settings reset: There is a small hole at the back of gamepad, press the hole by using a needle to reset the factory settings.

※Attention

1. Avoid strong vibration, do not disassemble, refit or repair on your own.
2. Do not keep in humid, high temperature or soot place.
3. Avoid water or other liquid in gamepad, it may affect the performance of gamepad.
4. Keep away from fire, the built-in battery has danger of explosion.
5. Charging voltage is USB 3.7-5.5V DC supply (normal Android smart phone charging power can be used)
6. Children should be under adult's supervision to use this product.
7. Please contact the distributor or our after-sale service staff if you have any quality problem or suggestions.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- o Reorient or relocate the receiving antenna.
- o Increase the separation between the equipment and receiver.
- o Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- o Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
