Flashes Red and White at the Same Time	Restore to Factory Setting

Connect Your Base Station to the Internet

1. Insert the TF card into the base station.

(!)

Note: Micro SD card shall be formatted before use.

2. Connect the base station to a power source.

3. Connect the base station to your router with the included Ethernet cable. The LED indicator on the base station will keep flashing red when connecting and turn solid white once successfully connected.

Charge the Camera

 ∇

Please fully charge the camera before use to ensure longer working time. Once fully charged, the LED indicator on the camera will stay solid red.

Micro USB Charging Port	

Turn on the Camera

Press the Sync Button on the camera to turn it on. The LED indicator on the camera will stay solid on for 5 seconds then turn off.

Get the APP and Setup

Before using the device, please download the "VAVA Home" app from the App Store (iOS devices) or Google Play (Android devices).

Once installed, please follow the onscreen instructions to complete the setup as instructed below.

V/\V/\	
Forgot password?	
Login	Next
	INEAL

1. Open VAVA Home APP, tap "New to VAVA Home" to register via the right email address, and then login in with the email and password you set.

Add device

2. Tap "Add Base Station" and follow the instructions on VAVA Home APP for the remaining steps. After all the remaining steps are completed, tap OK, then the base station is added successfully.

(!)

Note: This base station can only be bound to one account. If you want to bind a new account, you shall unbind the old one.

3. Tap "Add Camera" and follow the instructions on VAVA Home APP for the remaining steps. After all the remaining steps are completed, tap OK, then the camera is successfully paired with a warning tone "Camera successfully synced with the base station".

Homepage

Tap ♠ on the bottom left corner, the real-time video is displayed here. You can tap "Live" to view the realtime video, or tap இ to set the basic parameters for the camera.

Record History

Tap ID on Homepage, all the videos recorded (Micro & Cloud) are displayed here. You can check the records for Today or for a specific day by selecting the date.

My VAVA

Tap 2 on the bottom right corner, the basic information of the account and devices are displayed here. If you have any problems regarding installation and operation, you can tap FAQ to find the solutions. You can also tap Feedback to leave your problems regarding this products.

Mounting Height and Location

Hang VAVA Home Cam 7 - 10ft (2 - 3m) above the ground. This height maximizes the detection range of the PIR motion sensor. Avoid placing it under direct sunlight. You can install the camera on a shelf, wall, or any flat surface with our complete mounting set.

VAVA

On the wall

Fasten the mounting screws into the wall and attach the magnetic mount. When you are mounting the camera to drywall, be sure to use the plastic anchors.

On the Stand Mount

On a desktop or a shelf

Caution

- Use the included power adapters only to charge the camera and the base station within the permitted voltage range.
- $\cdot\,$ Only the camera is waterproof. The base station and adapters are for indoor use only.
- $\cdot\,$ Make sure the internet is functional and fast for live data feed.
- $\cdot\,$ Do not use the product at temperatures higher or lower than the specified range.
- Do not use in environments with strong electromagnetic interferences or near corrosive substances.
- The warranty does not cover defects and damages caused by misuse, unauthorized dismantling, or natural hazards.
- The battery life varies according to the frequency of the triggers and the video resolution settings.
- The PIR motion sensor can only detect motions within a certain ranges and will not be activated by motions out of the range.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

FCC STATEMENT:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1)This device may not cause harmful interference, and

(2)This device must accept any interference received, including interference that may cause undesired operation.

\triangle

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

(!)

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- · Consult the dealer or an experienced radio/TV technician for help
