SAFETY PRECAUTIONS:

- Please note the following precautions before initial use. Failure to comply may be dangerous and cause damage to your mobile devices.
- Charge the speaker fully before initial use.
- Using an incorrect AC power adapter, adapter tip or USB cable can cause damage to both your mobile devices and the headphones.
- Always recharge the headphones in a well-ventilated area. Do not leave the speaker in hot or cold places.
- Do not immerse the speaker in water or expose it to moisture or weather conditions.

- Do not drop, knock, or shake the speaker.
- Rough handling can damage the internal precision component and its boards.
- Keep the speaker away from children, this device is not a toy.
- While charging, the speaker casing may become warm, which is normal as the charging and discharging processes generate heat.
- Keep the speaker away from fire or other sources of heat. Exposing the speaker to high temperatures may cause it to explode.
- Do not short-circuit the speaker, as this may cause damage to the unit.
- Unauthorized changed or modifications may void your right to use this product.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
