To whom it may concern:

The RF chip, model AC6928B, which installed in our product Victrola Lily, Model: VS-170, FCC ID: 2AFHW-VS170, supports BDR (GFSK), EDR ($\pi/4$ -DQPSK, 8DPSK), and BLE functions. For use in America and this chip will not support/enable EDR (8DPSK), BLE function. The EDR (8DPSK), BLE function has been shielded by the manufacturer using the software.

Sincerely Yours,

Alfonso Minopoli
