

正面:

Thank you for choosing YI Dome Camera

1. Camera kit

YI Dome Camera × 1
Manual × 1
Screw × 2
Micro USB Cable × 1
Base tray × 1
Adaptor × 1

2. Getting to know the Camera

3. How to use the Camera

a) Powering on and off:
Place the camera close to the router, and make sure Wi-Fi access is available, then connect the cable to the Micro USB port on the back of the camera to the power outlet as shown.

背面:

b) Downloading the App
Download the app by searching "YI Home" on the App Store or Google Play. Alternatively, you can open a QR scanner app and scan the YI Home App QR Code below to install the app.

4. Mounting Instructions

Note: The mounting wall should support at least 3 times the total weight of the bracket and the camera.

Fix the base tray to the wall with the screws

Install the device

Important safety guidelines

- Read these instructions.
- Clean only with dry cloth.
- This camera is for indoor use only.
- Only use attachments/accessories specified by the manufacturer.
- Unplug this apparatus during lightning storms or when not in use for long periods of time.
- To get the best usage out of this product, please consistently update to the latest versions of our app and firmware.

WARNING:
Open flame sources such as candles should not be placed near or on the product.

Note:

The device complies with Part 15 of the FCC Rules / Industry Canada license-exempt RSS standard(s). Operation is subject to the following conditions: (1) the device may not cause harmful interference, and (2) the device must accept any interference received, including interference that may cause undesired operation.

Le présent appareil est conforme aux CNR d'Industry Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'entraîner un fonctionnement défectueux.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Under Industry Canada regulations, the radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential interference to other users, the antenna type and gain should be so chosen that the resultant radiated (or transmitted) power (EIRP) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industry Canada, le présent appareil radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvés pour l'émission par Industry Canada. Dans le but de réduire les risques de brouillage radioélectrique à d'autres utilisateurs, le type et le gain de l'antenne doivent être choisis de façon à ce que la puissance rayonnée (EIRP) ne dépasse pas celle nécessaire à l'établissement d'une communication satisfaisante.

RF Exposure Requirements
To satisfy FCC / IC RF exposure requirements, a separation distance of 20 cm or more should be maintained between the antenna of the device and persons during operation. To ensure compliance, operation at closer than the distance is not recommended.

Les antennes installées doivent être utilisées de façon à ce que la puissance rayonnée (EIRP) ne dépasse pas celle autorisée par Industry Canada. Dans le but de réduire les risques de brouillage radioélectrique à d'autres utilisateurs, le type et le gain de l'antenne doivent être choisis de façon à ce que la puissance rayonnée (EIRP) ne dépasse pas celle autorisée par Industry Canada.

La FCC exige à titre exigé que cet appareil doit être en tout temps éloigné d'au moins 20 cm des personnes pendant son fonctionnement.

CE, FCC, and other regulatory marks.
