

Operate the device

1. Use the infrared remote control to operate the box.
2. Or use a wired or wireless mouse/keyboard to operate the box.

Connect to the network

There are two ways to connect to network, one is by Ethernet, another is by Wi-Fi. When first time use Wi-Fi you need to set up the Wi-Fi.

1. Click 'Settings'.
2. Turn on Wi-Fi, choose the Wi-Fi router.
3. Input the password (if has), click 'Connect' and when connected, the bottom right corner of the screen will display the Wi-Fi icon.

Frequently Asked Questions:

1. If you do not see the LED lights, check the power if connected well.
2. If the LED light is bright and the TV is turned on but TV screen doesn't show TV box interface, please check whether the HDMI is connected well, or check whether the TV video output has been switched to HDMI output.
3. If you can not see mouse icon on TV screen, please check whether the mouse is connected well, if you use 2.4G wireless mouse, please make sure it has battery inside. (Some of the mouses do not match the TV box due to non-standard, please consult the mouse suppliers)
4. If you have set up the Wi-Fi network, but still no Internet access, please check if the Wi-Fi icon in lower right corner is completely gray. If it is gray it means the Wi-Fi signal is weak, approach the router or access point to verify wireless connection.
5. Some applications are designed for mobile phones and may not be full screen displayed.
6. If some applications can not be used, these applications may not be optimized for the Android operation system.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

The distance between user and products should be no less than 20cm
